energy future

2024 Second Quarter
Financial Update

Disclaimer

This presentation contains summarized information concerning MGE Energy, Inc. ("MGE Energy") and its subsidiaries (principally Madison Gas and Electric Company ("MGE")) and MGE Energy's consolidated business, operations, financial performance and trends. No representation is made that the information in this presentation is complete. For additional information on MGE Energy and its subsidiaries, see MGE Energy's Annual Report on Form 10-K for the year ended December 31, 2023 (the "2023 Form 10-K") as updated by its Quarterly Report on Form 10-Q for the quarter ended June 30, 2024 (the "June 30, 2024 Form 10-Q") filed with the Securities and Exchange Commission (the "SEC"), as well as MGE Energy's other filings with the SEC from time to time. The 2023 Form 10-K, the June 30, 2024, Form 10-Q and other SEC filings are available at the SEC's web site at [sec.gov](https://www.sec.gov) and on MGE Energy's web site at [mgeenergy.com](https://www.mgeenergy.com). Information contained on MGE Energy's web site (including any such information referred to herein) shall not be deemed incorporated into, or to be a part of, this presentation.

This document does not constitute an offer to sell, or the solicitation of an offer to buy, any securities of MGE Energy, Inc., or Madison Gas and Electric Company. A registration statement relating to the common stock of MGE Energy, Inc., has been declared effective by the Securities and Exchange Commission. Any offering of such common stock is being made solely by means of a prospectus supplement and an accompanying prospectus, copies of which may be obtained from MGE Energy, Inc., at 133 South Blair Street, Madison, Wisconsin 53703, attention: Shareholder Services, telephone no. (800) 356-6423.

Cautionary Note – Forward Looking Information

All statements in this presentation, other than historical facts, are forward-looking statements (including but not limited to forecasted capital expenditures, expected in-service dates and carbon dioxide projections) that involve risks and uncertainties that are subject to change at any time. Such statements are based upon management's assumptions, expectations and estimates at the time they are made. Specifically, the forecasted capital expenditures are based upon management's assumptions with respect to future events, including the timing and amount of expenditures associated with compliance with environmental compliance initiatives, legislative and regulatory initiatives, customer demand and support for electrification and renewable energy resources, energy conservation initiatives, load growth, the timing of any required regulatory approvals and the adequacy of rate recovery. Additionally, the expected in-service dates are forward looking and therefore subject to significant business, economic, operational and regulatory uncertainties and contingencies, many of which are beyond the control of the company and are based upon assumptions with respect to future decisions, which are subject to change. Various factors could cause actual results, capital expenditures, in-service dates or carbon reduction to be significantly different than those contemplated, estimated or projected in forward-looking statements - especially as they relate to economic conditions, future load growth, revenues, expenses, capital expenditures, financial resources, regulatory matters, and the scope and expense associated with future environmental regulation. Those factors include the assumptions and factors referred to in the statements themselves as well as risk factors described in our 2023 Form 10-K and other reports filed with the SEC. We caution investors that these forward-looking statements are subject to known and unknown risks and uncertainties that may cause actual results to differ materially from those projected, expressed, or implied. MGE Energy undertakes no obligation to update or revise any forward-looking statements to reflect events or circumstances occurring after the date as of which any forward-looking statement is made, except as required by law.

Company Mission and Values

MGE Energy is the parent company of Madison Gas and Electric Company (MGE). MGE is ***your community energy company***, committed to engaging with our customers in different ways to meet their needs and to providing safe, reliable, affordable and sustainable energy to power our communities. Your community energy company is investing in a more sustainable future for the benefit of all our customers, investors and employees.

Safety

Safety is a core value at MGE. The safety of our employees, customers and communities is our top priority.

Reliability

We invest in our people and in our systems to help ensure top-ranked energy reliability that helps to maintain the economic health and vitality of the communities we serve.

Sustainability

With a commitment to transparency, accountability and continuous improvement, we take a holistic and proactive approach to sustainable practices companywide.

Equity

We are committed to equity and inclusion in our service to our customers, in our workplace and in our broader community, and we value diverse perspectives, ideas, cultures and backgrounds.

Engagement

We are dedicated to engagement, partnership and collaboration to best serve our customers and the broader community.

Company Highlights

DIVERSIFIED CUSTOMER BASE AND REVENUE PROFILE

Resilient Revenue Stream and Customer Base

- Electric service to ~163,000 customers located in the city of Madison and adjacent areas
 - 87% residential; 13% commercial or industrial
 - Accounts for ~71% of regulated revenue
- Natural gas to ~176,000 customers
 - 90% residential; 10% commercial or industrial
 - Accounts for ~29% of regulated revenue

REGULATED, HIGHLY VISIBLE GROWTH

Historical 5-Year EPS CAGR of 6%, Regulated PPE⁽¹⁾ CAGR of ~7%

- Forecasted capital investment of ~\$1.2B from 2024 through 2028⁽³⁾
- 48 consecutive years of dividend increases
- Premium service territory with constructive regulation
- Forward-looking test years
- Ability to work cooperatively with large customers to tailor a local renewable energy solution

STRONG FINANCIAL PROFILE

Stable Earnings Growth with Strong Balance Sheet

- Predominantly regulated earnings
- Strong liquidity and cash position
- Conservative financial policies that are designed to achieve strong credit quality
- MGE's Credit Ratings⁽²⁾
 - S&P: AA- (Stable)
 - Moody's: Aa2 Secured (Stable)
A1 Unsecured (Stable)

SUBSTANTIAL SUSTAINABLE INVESTMENT

Seeking Net-Zero Carbon Electricity by 2050⁽³⁾

- Targeting carbon reduction of ≥80% from 2005 levels by 2030
- Plan to eliminate coal as energy source by end of 2032
- Decarbonizing generation fleet by transitioning to clean energy, such as wind and solar
- Electrifying transportation

(1) Property, plant, and equipment, net

(2) A credit rating is not a recommendation to buy, sell or hold securities and may be lowered or withdrawn by the rating agency at any time.

(3) Information on this slide contains statements that are forward looking statements that involve risks and uncertainties that are subject to change at any time. See Cautionary Note Regarding Forward Looking Information.

Earnings and Dividends Growth

Diluted Earnings Per Share

Dividends Per Share

Focused on Sustainability and Reliability

- See Cautionary Note Regarding Forward-Looking Information at the beginning of this presentation.
- Capital expenditures for generation supporting carbon reduction goals include approximately \$25 million related to the purchase an additional 25 MW of capacity of the West Riverside natural gas-fired generating plant, which received PSCW approval in April and closed in June of this year.
- Forecasted and actual capital expenditures do not include AFUDC. Forecasted capital expenditures include future projects which will require MGE to request and obtain approval from the PSCW.

Expanding Clean Energy Portfolio

In Progress				
Project	Investment (\$M)	Ownership Interest	Nameplate (MW)	Estimated In-Service Date
Paris Solar-Battery	\$61 ^(a)	10%	20 Solar/ 11 Battery	2024 Solar/ 2025 Battery
Darien Solar ^(b)	\$48 ^(a)	10%	25	2024
Koshkonong Solar ^(b)	\$65 ^(a)	10%	30	2026
High Noon Solar ^{(c)(d)}	\$65	10%	30	2026
Sunnyside Solar-Battery ^(c)	\$112	100%	20 Solar/ 40 Battery	2026 Solar/ 2027 Battery

(a) MGE received PSCW approval to recover 100% AFUDC

(b) As part of its order, the PSCW approved battery capacity at these projects, which are no longer included in the current estimate. MGE will continue to evaluate timing, cost and feasibility of the installation of batteries.

(c) Project seeking regulatory approval

(d) Seeking approval of 16.5 MWs of battery capacity that is not included in the capital plan. Final implementation of batteries TBD.

Transition Toward Cleaner Energy

Track Record of Accelerating Pace of Decarbonization

MGE's clean energy transition has reduced emissions while maintaining top-ranked electric reliability, strengthening key infrastructure, and providing affordable power to customers.

- **2015:** Energy 2030 framework introduced with goal to reduce carbon emissions 40% by 2030
- **2019:** Target of net-zero carbon electricity by 2050 announced
- **2020:** Expected carbon reductions updated to at least 65% by 2030
- **2022:** Energy 2030 goal updated to at least 80% carbon reduction by 2030

Foundational Objectives in MGE's Energy 2030 Framework

- Transition MGE to a more environmentally sustainable energy supply
- Provide customers with options they want today and in the future
- Help customers use energy efficiently and manage future costs
- Provide dynamic electric grid, enabling and integrating new energy technologies
- Deepen engagement with community; ensure all customers benefit from new technologies.

Strategies for Deep Decarbonization

- Grow MGE's use of renewable energy and eliminate coal as an energy source
- Further engage customers in energy efficiency
- Electrify transportation and other end uses

Net-Zero

CARBON ELECTRICITY BY 2050

Note: 39% reduction in carbon emissions since 2005 benchmark as of December 31, 2022

Plan to Eliminate Coal-Fired Generation

Retiring the coal-fired Columbia Energy Center

In 2022, the target retirement date for both units at the Columbia Energy Center was updated to June 2026. The revised retirement date reflects tight energy supply conditions in the Midwest power market and supply chain issues that likely will delay commercial operation of renewable energy projects.

- MGE owns 19% of the facility (211 MW)
- Retirement will eliminate ~2/3 of MGE's ownership of coal-fired generation capacity

Enhancing fuel flexibility at Elm Road Generating Station

MGE, along with co-owner WEC Energy Group, has announced its plan to enhance fuel flexibility at the Oak Creek (Elm Road) Power the Future units, pending approvals.

- MGE owns 8.33% of the facility (106 MW)
- Elm Road units are expected to be fully transitioned away from coal by end of 2032
- Elm Road repowering will eliminate coal-fired generation from MGE's portfolio of owned resources

	Ongoing transition from coal
2026	planned retirement of Columbia Energy Center
2030	coal as backup fuel at Elm Road Generating Station
2032	coal-fired generation eliminated from portfolio

MGE continues to evaluate additional investments in cost-effective, clean energy projects to maintain its top-ranked electric reliability and to achieve its carbon reduction goals.

Transmission Investment Outlook

- ✓ MGE Energy anticipates material transmission investment opportunities later this decade through ATC.
 - MGE Energy holds 3.6% equity ownership interest in ATC.
- ✓ ATC projects new capital expenditures peaks in 2024 and beyond, with 2024-2028 projected investment of ~\$5 billion driven by generator interconnections, asset renewal, and MISO Long Range Transmission Plan (LRTP).
- ✓ MISO LRTP Tranche 1 Portfolio proposal addresses needs across the MISO Midwest region and would be incremental to ATC's base case maintenance and interconnection capital expenditures.
 - Represents ~\$900 million investment opportunity for ATC.
 - Projected to begin in 2025 and occur primarily in the last few years of this decade.
 - Tranche 1 projects would be incremental to ATC's base case maintenance and interconnection expenditures.
 - Tranche 2 planning is underway.

ATC Projected Capital Expenditures

Note: Projected capital expenditures are from ATC LLC forecasts available via www.atcllc.com/oasis-directory. Projected ATC capital expenditures reflect the 2022 generator interconnections queue. Does not include pending affected system impact studies, future generator interconnection queues, or LRTP Tranche 2. Capital investments by ATC are expected to be funded through a combination of internally generated cash flow, debt, and investor contributions. As opportunities arise, MGE Energy plans to make additional investments in ATC through voluntary capital calls based upon its pro rata equity ownership interest in ATC.

Natural Gas Distribution – Emissions Reductions Beyond Carbon

Building upon our long-standing commitment to providing affordable, sustainable energy, MGE has set a goal to achieve Net-Zero Methane Emissions from its natural gas distribution system by 2035.

- MGE is working to reduce overall emissions from its natural gas distribution system cost-effectively as quickly as possible.
- If MGE can accelerate plans to achieve net-zero methane emissions from its natural gas system through the evolution of new technologies, it will.

Natural gas continues to be a critical resource for meeting reliable, efficient, and affordable energy needs. About half of U.S. households use natural gas for heating.

- In 2022, MGE completed an in-depth analysis and inventory of GHG emissions associated with the purchase and distribution of natural gas and other sources, such as indirect emissions from gas usage by our customers.
- MGE has replaced and upgraded all piping made of material considered leak-prone throughout its distribution system.
- MGE's leak inspection schedule already exceeds federal requirements.

Constructive Regulatory Environment

Both S&P and Moody's view the Wisconsin regulatory environment as highly credit supportive with timely operating and capital cost recovery, and view MGE's relationship with the Public Service Commission as constructive.

Regulatory approvals of utility-scale renewable investments and community solar programs

- Utility-Scale: Saratoga Wind, Forward Wind, Two Creeks Solar, Badger Hollow I & II Solar, Red Barn Wind
 - Darien Solar Energy Center, Paris Solar-Battery Park, Koshkonong Solar Energy Center (construction in progress)
 - High Noon Solar Park, Sunnyside Solar-Battery (pending PSCW approval)
- Community: Renewable Energy Rider and Shared Solar programs

Supportive regulatory framework including:

- Forward-looking test years
- Historical approval of various expense deferrals
- Fuel Rules (2% bandwidth) and Gas Cost Recovery Mechanism
- Pre-Approval from regulator for major construction projects
- Current return on 50% of CWIP or 100% AFUDC on major construction projects
- Escrow treatment received for transmission, Elm Road Generating Station, pension & OPEB and bad debt expense
- Deferral treatment for impacts of tax credit transferability and PTC/ITC available under IRA

PSCW Regulators

WISCONSIN COMMISSIONERS	PARTY	TERM BEGAN	TERM ENDS
Summer Strand (Chair)	D	Mar 2023	Mar 2029
Kristy Nieto*	D	Feb 2024	Mar 2025
Marcus Hawkins*	D	Apr 2024	Mar 2027

* Pending confirmation

COMMISSION:

- Gubernatorial appointment, Senate confirmation
- Chair: Gubernatorial appointment
- 6-year staggered terms

Governor Tony Evers (D)

2024/2025 Rate Case Outcomes

TERMS (\$000's where applicable)	APPROVED 2024 TY	APPROVED 2025 TY
Average Electric Rate Base	\$1,185,550	\$1,241,502
Average Gas Rate Base	\$335,533	\$341,369
Average Common Stock Equity	\$917,952	\$945,483
Regulatory Equity Layer	56.13%	56.06%
Authorized ROE	9.70%	9.70%
Increases in Base Rates	1.54% Elec 2.44% Gas	4.17%¹ Elec 1.32% Gas

2024 / 2025 Increase in Base Rates:

- Increased rate base including investments in Paris, Darien, local solar projects, West Riverside, Koshkonong, and continued grid modernization
- Recovery of higher transmission, pension/OPEB, and uncollectible costs (including costs previously deferred from prior years)
- Cost increases were partially offset by a decrease in fuel costs and the benefit of lower tax expense
- Deferral of revenue requirement impacts of force majeure costs for certain large capital projects
- Deferral of revenue requirement impacts of differences between actual and projected in-service dates for certain large capital projects
- Authorized to maintain strong ~56.1% equity layer, ROE reduced 10 basis points (from 9.8%)
- Earnings sharing mechanism implemented for MGE's regulated utility operations
- Gas residential fixed charge reduced from ~\$22/month (2023 level) to ~\$20/month for 2024 and ~\$18/month for 2025

Note: Under the earnings sharing mechanism, if MGE earns above its authorized ROE: (i) the utility will retain 100% of earnings for the first 15 basis points above the authorized ROE; (ii) 50% of the next 60 basis points will be required to be refunded to ratepayers; and (iii) 100% of any remaining excess earnings will be required to be refunded to ratepayers.

¹MGE filed a 2025 Fuel Cost Plan with the PSCW in June 2024. The plan would lower the 2025 increase in electric rates to 2.47%. MGE expects a final decision from the PSCW on the Fuel Cost Plan by the end of 2024.

Customer Affordability

Average residential electric customer bill as % of Wisconsin median household income

MGE residential electric customer bill as a percentage of customer wallet at 1.55% is below the Wisconsin utility peer average of 1.75%.

MGE's affordability as percentage of customer wallet has improved 22% since 2012.

Sources: Median household income data sourced from Federal Reserve Economic Data (FRED).

Average Residential customer bill sourced from FERC Form 1 filings (2022) of Madison Gas & Electric, Wisconsin Electric Power Co., Wisconsin

Public Service Corp., Wisconsin Power & Light Co., Northern States Power-Wisconsin

Inflation Reduction Act of 2022 (IRA)

The IRA supports MGE's carbon reduction strategy and increases flexibility toward meeting customer needs for affordable and reliable clean energy resources.

- ✓ **Positioned to deliver material benefits to customers**
 - Long-term extension of tax credits aligns with customer demand for additional clean energy
 - Reduces both upfront and lifetime cost of generation fleet transition
 - Increases efficiency of tax credit monetization
 - Supports credit metrics while improving customer affordability

- ✓ **Incentivizes development of clean energy resources**
 - Tax credits reduce cost and increase flexibility for deployment of renewables and energy storage
 - May enable a larger backlog of capital investment opportunities
 - Encourages acceleration of electric vehicle (EV) adoption nationally

The IRA contains a provision that allows the transfer of certain tax credits to other corporate taxpayers in exchange for cash. MGE intends to transfer 2023 and 2024 tax credits. The PSCW approved the deferral by MGE of any differential between tax credit transfer proceeds and the tax value of credits reflected in rates to its next rate case filing.

Strong Credit Ratings

S&P (UTILITY RATINGS)	
Corporate credit	AA-
Business risk	Excellent
Commercial paper	A-1+
Outlook	Stable
<ul style="list-style-type: none"> • Effective management of regulatory risk • Supportive regulatory environment • Focus on regulated vertically integrated electric and natural gas distribution operations • Conservative financial policies that ensure strong credit quality 	

MOODY'S (UTILITY RATINGS)	
Secured	Aa2
Unsecured	A1
Commercial paper	P-1
Outlook	Stable
<ul style="list-style-type: none"> • Credit supportive regulatory environment • Healthy financial metrics (CFO pre-WC / Debt) • Stable rating outlook assumes future prudently incurred investments will be recovered • Funding will replicate authorized capital structure

Electric Vehicles and Deep Carbonization

MGE has been supporting the adoption of alternative fuel vehicles since the launch of its public charging network more than a decade ago and anticipates continued electrification of transportation could drive incremental sales growth over the long term.

Electrification of fleet vehicles

- MGE targeting 100% electric or plug-in hybrid light-duty vehicle fleet by 2030

Partnership with City of Madison

- Madison targets a 100% electric bus rapid transit (BRT) system
 - Deployment of first 27 electric buses by late 2024
 - MGE helped secure federal funding for initial bus charging infrastructure
 - MGE enabled charging for Madison Fire Department's first electric fire truck

Advancing Sustainable Transportation

- New MGE fast-charging hub in downtown Madison's Capitol East District
- PSCW approval of new/expanded EV Tariffs in October 2022
- Transition Home Electric Vehicle Charging Pilot (Charge@Home) to a standard tariff offering with proposed modifications based on initial pilot
- New EV charging pilots authorized include Apartment and Workplace EV Managed Charging, Fleet EV Charging and EV Managed Charging Rewards

Transportation accounts for almost 30% of U.S. greenhouse gas emissions. MGE is pursuing a multi-pronged strategy to electrify transportation to reduce carbon dioxide emissions and to enable future market growth.

Our ESG Commitments

80% reduced carbon emissions by 2030
Net-Zero carbon electricity by 2050

Net-Zero methane emissions from our natural gas distribution system by 2035

2/3 coal-fired generation capacity eliminated by the end of 2026
Coal as a backup fuel by end of **2030**
Zero ownership of coal by end of 2032

> \$1 billion in clean energy investment estimated through 2028*

100% all-electric or plug-in hybrid light-duty MGE fleet vehicles by 2030

**Since 2015*

ESG Highlights - Environment

Track Record of Increasing Pace of Decarbonization

- MGE's clean energy transition has reduced emissions while maintaining top-ranked electric reliability, strengthening key infrastructure, and providing affordable power to customers.

Foundational Objectives in MGE's Energy 2030 Framework

- Transition MGE to a more environmentally sustainable energy supply
- Provide customers with options they want today and in the future
- Help customers use energy efficiently and manage future costs
- Provide dynamic electric grid, enabling and integrating new energy technologies
- Deep engagement with community; ensure all customers benefit from new technologies

Strategies for Deep Decarbonization

- Increase use of renewable energy and eliminate coal as an energy source
- Further engage customers in energy efficiency
- Electrify transportation and other end uses

ESG Highlights - Social

Annual Giving

MGE is committed to helping improve the quality of life for all those we serve through:

- Corporate giving, partnerships and collaborations
- Charitable giving: In the last five years, the MGE Foundation has given more than \$8.7M to more than 400 community organizations that help preserve the health and vitality of our community.
- Employee volunteerism and service

Safety

- Safety Steering Team – examines safety topics and prioritizes continuous improvement opportunities
- Corporate Safety Commitment – safety vision statement, "We Power Safety"
- Board oversight of safety program
- MGE has ranked in the top three utilities in the country for the fewest number of outages per customer for more than 15 years

In 2022, MGE was awarded the inaugural Leading Indicator Safety Award by the American Gas Association (AGA), a national organization that represents more than 200 local energy companies.

We Power Safety. Work Safe. Home Safe.

ESG Highlights - Governance

Our Board of Directors has a strong commitment to corporate responsibility and accountability. Community-focused and with a breadth and diversity of experience, board members bring strong effective oversight in their service to MGE and MGE Energy.

The company's commitment to diversity, equity and inclusion is an ongoing area of focus for directors as part of the corporate culture, the organization's service to its customers and communities, and as a priority for composition of the board itself.

Our Lead Independent Director has extensive authority and responsibility in ensuring the board meets its responsibilities for effective oversight and sound governance.

The Lead Independent Director is empowered to call meetings of the board or executive sessions and chairs executive sessions and the Corporate Governance Committee.

The Lead Independent Director also provides input to the Chairman on the scope, quality, quantity and timeliness of the information provided to the board and serves as a nonexclusive conduit to the Chairman of views and concerns of our directors.

Amended and Restated Bylaws for MGE Energy

- In connection with a periodic review of the By-laws and the SEC's rules regarding universal proxy card the board recently refreshed and adopted amended and restated by-laws.

The information above includes MGE Energy's three new directors effective March 1, and excludes the two directors who have reached mandatory retirement age.

Appendix

Corporate Structure

Over 98% of MGE Energy assets are dedicated to regulated and quasi-regulated utility operations.

Service Territory Highlights

MGE's service territory is a growing and diverse community of urban, suburban and rural communities. The Madison area and Dane County lead the state of Wisconsin in population growth.

- Seat of state government
- Home to the flagship University of Wisconsin – Madison
- Robust biotech industry and entrepreneurial community
- 2.5% unemployment below US average
- Madison ranks 11th best place to live - US News and World Report (2023)
- Best places to retire in the US – Forbes (2022)
- Third fastest-growing startup city in the US – York IE (2022)

All contribute to the economic resiliency of MGE's service territory
