#### PART I. FINANCIAL INFORMATION.

#### **Filing Format**

This combined Form 10-Q is being filed separately by MGE Energy, Inc. (MGE Energy) and Madison Gas and Electric Company (MGE). MGE is a wholly owned subsidiary of MGE Energy and represents a majority of its assets, liabilities, revenues, expenses, and operations. Thus, all information contained in this report relates to, and is filed by, MGE Energy. Information that is specifically identified in this report as relating solely to MGE Energy, such as its financial statements and information relating to its nonregulated business, does not relate to, and is not filed by, MGE. MGE makes no representation as to that information. The terms "we" and "our," as used in this report, refer to MGE Energy and its consolidated subsidiaries, unless otherwise indicated.

# **Forward-Looking Statements**

This report, and other documents filed by MGE Energy and MGE with the Securities and Exchange Commission (SEC) from time to time, contain forward-looking statements that reflect management's current assumptions and estimates regarding future performance and economic conditions—especially as they relate to economic conditions, future load growth, revenues, expenses, capital expenditures and rate recovery, financial resources, regulatory matters, and the scope and expense associated with future environmental regulation. These forward-looking statements are made pursuant to the provisions of the Private Securities Litigation Reform Act of 1995. Words such as "believe," "expect," "anticipate," "estimate," "could," "should," "intend," "will," "commit," "target," and other similar words, and words relating to goals, targets and projections, generally identify forward-looking statements. Both MGE Energy and MGE caution investors that these forward-looking statements are subject to known and unknown risks and uncertainties that may cause actual results to differ materially from those projected, expressed, or implied.

The factors that could cause actual results to differ materially from the forward-looking statements made by a registrant include: (a) those factors discussed in the registrants' 2023 Annual Report on Form 10-K: Item 1A. Risk Factors, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, as updated by Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations in this report, and Item 8. Financial Statements and Supplementary Data – Note 16, as updated by Part I, Item 1. Financial Statements – Note 8 in this report, and (b) other factors discussed herein and in other filings made by that registrant with the SEC.

Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this report. MGE Energy and MGE undertake no obligation to release publicly any revision to these forward-looking statements to reflect events or circumstances after the date of this report, except as required by law.

#### Where to Find More Information

We file annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and other information with the SEC. The SEC maintains an internet site at www.sec.gov that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

MGE Energy maintains a website at mgeenergy.com, and MGE maintains a website at mge.com. Copies of the reports and other information that we file with the SEC may be obtained from our websites free of charge. Information contained on MGE Energy's and MGE's websites shall not be deemed incorporated into, or to be a part of, this report.

# MGE Energy, Inc., and Madison Gas and Electric Company Notes to Consolidated Financial Statements (unaudited) June 30, 2024

#### 1. Summary of Significant Accounting Policies – MGE Energy and MGE.

#### a. Basis of Presentation.

This report is a combined report of MGE Energy and MGE. References in this report to "MGE Energy" are to MGE Energy, Inc. and its subsidiaries. References in this report to "MGE" are to Madison Gas and Electric Company.

MGE Power Elm Road and MGE Power West Campus own electric generating assets and lease those assets to MGE. Both entities are variable interest entities (VIE) under applicable authoritative accounting guidance. MGE is considered the primary beneficiary of these entities as a result of contractual agreements. As a result, MGE has consolidated MGE Power Elm Road and MGE Power West Campus. See Footnote 3 of Notes to Consolidated Financial Statements under Item 8, Financial Statements and Supplementary Data, of MGE Energy's and MGE's 2023 Annual Report on Form 10-K (the 2023 Annual Report on Form 10-K).

The accompanying consolidated financial statements as of June 30, 2024, and during the three and six months ended, are unaudited but include all adjustments that MGE Energy and MGE management consider necessary for a fair statement of their respective financial statements. All adjustments are of a normal, recurring nature except as otherwise disclosed. The year-end consolidated balance sheet information was derived from the audited balance sheet appearing in the 2023 Annual Report on Form 10-K but does not include all disclosures required by accounting principles generally accepted in the United States of America. These notes should be read in conjunction with the financial statements and the notes on pages 59 through 107 of the 2023 Annual Report on Form 10-K.

#### b. Cash, Cash Equivalents, and Restricted Cash.

The following table presents the components of total cash, cash equivalents, and restricted cash on the consolidated balance sheets.

|   | <br>MGE Energy |                    |        |    | MGE      |    |            |  |
|---|----------------|--------------------|--------|----|----------|----|------------|--|
|   | June 30,       | e 30, December 31, |        |    | June 30, |    | cember 31, |  |
| (In thousands)                              | 2024           |                    | 2023   |    | 2024     |    | 2023       |  |
| Cash and cash equivalents                   | \$<br>16,270   | \$                 | 11,140 | \$ | 3,867    | \$ | 2,819      |  |
| Restricted cash                             | 792            |                    | 858    |    | 792      |    | 858        |  |
| Receivable - margin account                 | <br>2,475      |                    | 3,028  |    | 2,475    |    | 3,028      |  |
| Cash, cash equivalents, and restricted cash | \$<br>19,537   | \$                 | 15,026 | \$ | 7,134    | \$ | 6,705      |  |

# Cash Equivalents

All highly liquid investments purchased with an original maturity of three months or less are considered to be cash equivalents.

#### Restricted Cash

MGE has certain cash accounts that are restricted to uses other than current operations and designated for a specific purpose. MGE's restricted cash accounts include cash held by trustees for certain employee benefits and cash deposits held by third parties. These are included in "Other current assets" on the consolidated balance sheets.

# Receivable – Margin Account

Cash amounts held by counterparties as margin collateral for certain financial transactions are recorded as Receivable – margin account in "Other current assets" on the consolidated balance sheets. The costs being hedged are fuel for electric generation, purchased power, and cost of gas sold.

# c. Property, Plant, and Equipment.

#### Columbia.

An asset that will be retired in the near future and substantially in advance of its previously expected retirement date is subject to abandonment accounting. In the second quarter of 2021, the operator of Columbia received approval from Midcontinent Independent System Operator (MISO) to retire Columbia Units 1 and 2. The co-owners intend to retire Unit 1 and Unit 2 by June 2026. Final timing and retirement dates are subject to change depending on operational, regulatory, and other factors. As of June 30, 2024, early retirement of Columbia was probable.

Our ownership share of Columbia assets was classified as plant to be retired within "Property, plant, and equipment, net" on the consolidated balance sheets. Assets for Columbia Unit 1 and Unit 2 are currently included in rate base, and MGE continues to depreciate them on a straight-line basis using the composite depreciation rates approved by the Public Service Commission of Wisconsin (PSCW) that include retirement dates of 2029 for both Units.

If it becomes probable that regulators will disallow full recovery or a return on the remaining net book value of a generating unit that is either abandoned or probable of being abandoned, an impairment loss would be required. An impairment loss would be recorded to the extent that the remaining net book value of the generating unit exceeds the present value of the amount expected to be recovered from ratepayers. No impairment was recorded as of June 30, 2024.

# 2. New Accounting Standards - MGE Energy and MGE.

In November 2023, the Financial Accounting Standards Board modified authoritative guidance within the codification's Segment Reporting topic, which enhanced the disclosure requirements for significant segment expenses and other segment items. The authoritative guidance will become effective for fiscal years beginning after December 15, 2023, and for interim periods within fiscal years beginning after December 15, 2024. MGE will adopt the standard as of the effective date. The adoption of this standard will not have a material impact on MGE Energy's and MGE's financial statements.

In December 2023, the Financial Accounting Standards Board issued authoritative guidance within the codification's Income Taxes topic, which expanded the disclosure requirements over effective tax rate reconciliations and income taxes paid. For public business entities, the authoritative guidance will become effective for fiscal years beginning after December 15, 2024. MGE will adopt the standard as of the effective date. The adoption of this standard will not have a material impact on MGE Energy's and MGE's financial statements.

### 3. Investment in ATC and ATC Holdco - MGE Energy and MGE.

ATC owns and operates electric transmission facilities primarily in Wisconsin. MGE received an interest in ATC when it, like other Wisconsin electric utilities, contributed its electric transmission facilities to ATC as required by Wisconsin law. That interest is presently held by MGE Transco, a subsidiary of MGE Energy. ATC Holdco was formed by several members of ATC, including MGE Energy, to pursue electric transmission development and investments outside of Wisconsin. The ownership interest in ATC Holdco is held by MGEE Transco, a subsidiary of MGE Energy.

MGE Transco and MGEE Transco have accounted for their investments in ATC and ATC Holdco, respectively, under the equity method of accounting. Equity earnings from investments are recorded as "Other income" on the consolidated statements of income of MGE Energy. MGE Transco recorded the following amounts related to its investment in ATC:

|  | Three Months Ended |       |       | Six Months En |      |       | nded |       |  |
|--|--------------------|-------|-------|---------------|------|-------|------|-------|--|
|  | June 30            |       |       |               |      | June  |      |       |  |
| (In thousands)                         | 2024               |       | 2023  |               | 2024 |       | 2023 |       |  |
| Equity earnings from investment in ATC | \$ 2,748           |       | \$    | 2,599         | \$   | 5,470 | \$   | 5,182 |  |
| Dividends received from ATC            |                    | 2,132 |       | 2,042         |      | 4,238 |      | 4,248 |  |
| Capital contributions to ATC           |                    | 1,070 | 1,601 |               |      | 1,785 |      | 1,958 |  |

In July 2024, MGE Transco made a \$0.9 million capital contribution to ATC.

ATC's summarized financial data is as follows:

|                                       | Three Months Ended<br>June 30, |           |      |           |        | Six Mont  |    |           |
|---------------------------------------|--------------------------------|-----------|------|-----------|--------|-----------|----|-----------|
|                                       | _                              |           | : 50 | <u> </u>  | June 3 |           |    | <u> </u>  |
| (In thousands)                        |                                | 2024      |      | 2023      |        | 2024      |    | 2023      |
| Operating revenues                    | \$                             | 218,222   | \$   | 203,776   | \$     | 430,150   | \$ | 404,202   |
| Operating expenses                    |                                | (109,197) |      | (101,517) |        | (214,039) |    | (200,593) |
| Other income, net                     |                                | 356       |      | 565       |        | 543       |    | 956       |
| Interest expense, net                 |                                | (36,040)  |      | (33,504)  |        | (71,458)  |    | (66,414)  |
| Earnings before members' income taxes | \$                             | 73,341    | \$   | 69,320    | \$     | 145,196   | \$ | 138,151   |

MGE receives transmission and other related services from ATC. During the three and six months ended June 30, 2024, MGE recorded \$9.1 million and \$18.2 million, respectively, for transmission service compared to \$8.5 million and \$16.9 million for comparable periods in 2023. MGE also provides a variety of operational, maintenance, and project management work for ATC, which is reimbursed by ATC. As of June 30, 2024, and December 31, 2023, MGE had a receivable due from ATC of \$2.1 million and \$5.3 million, respectively. The receivable is primarily related to transmission interconnection activities at Badger Hollow and Paris solar generation sites. MGE will be reimbursed for these costs after the new generation assets are placed into service.

# 4. Taxes - MGE Energy and MGE.

#### **Effective Tax Rate.**

The consolidated income tax provision differs from the amount computed by applying the statutory federal income tax rate to income before income taxes, as follows:

|   | MGE E  | nergy  | MG     | E      |
|---|--------|--------|--------|--------|
| Three Months Ended June 30,                                 | 2024   | 2023   | 2024   | 2023   |
| Statutory federal income tax rate                           | 21.0 % | 21.0 % | 21.0 % | 21.0 % |
| State income taxes, net of federal benefit                  | 6.2    | 6.2    | 6.2    | 6.2    |
| Amortized investment tax credits                            | (2.4)  | (0.7)  | (2.6)  | (0.7)  |
| Credit for electricity from renewable energy                | (11.7) | (5.2)  | (12.9) | (5.6)  |
| AFUDC equity, net   | (0.7)  | (0.4)  | (0.7)  | (0.4)  |
| Amortization of utility excess deferred tax - tax reform(a) | (6.8)  | (1.6)  | (7.5)  | (1.7)  |
| Other, net, individually insignificant                      | 0.2    | 0.1    | 0.1    | 0.1    |
| Effective income tax rate                                   | 5.8 %  | 19.4 % | 3.6 %  | 18.9 % |

|   | MGE E  | nergy  | M0     | GE     |
|---|--------|--------|--------|--------|
| Six Months Ended June 30,                                   | 2024   | 2023   | 2024   | 2023   |
| Statutory federal income tax rate                           | 21.0 % | 21.0 % | 21.0 % | 21.0 % |
| State income taxes, net of federal benefit                  | 6.2    | 6.2    | 6.2    | 6.2    |
| Amortized investment tax credits                            | (2.3)  | (0.7)  | (2.5)  | (0.7)  |
| Credit for electricity from renewable energy                | (10.8) | (5.6)  | (11.9) | (6.1)  |
| AFUDC equity, net   | (0.7)  | (0.4)  | (0.7)  | (0.5)  |
| Amortization of utility excess deferred tax - tax reform(a) | (6.4)  | (1.7)  | (7.0)  | (1.8)  |
| Other, net, individually insignificant                      | (0.1)  | (0.1)  | (0.2)  | (0.1)  |
| Effective income tax rate                                   | 6.9 %  | 18.7 % | 4.9 %  | 18.0 % |

<sup>(</sup>a) Included are impacts of the Tax Cut and Jobs Act of 2017 for the regulated utility for excess deferred taxes recognized using a normalization method of accounting in recognition of IRS rules that restrict the rate at which the excess deferred taxes may be returned to utility customers. For both the three months ended June 30, 2024 and 2023, MGE recognized \$0.9 million. For both the six months ended June 30, 2024 and 2023, MGE recognized \$1.8 million. For the three and six months ended June 30, 2024, MGE recognized \$1.0 million and \$2.1 million, respectively, of deferred taxes not restricted by IRS normalization rules, compared to a net collection from customers of \$0.4 million and \$0.7 million for the three and six months ended June 30, 2023.

The Inflation Reduction Act of 2022 contains a provision that allows the transfer of certain tax credits to other corporate taxpayers in exchange for cash. MGE intends to transfer 2023 and 2024 tax credits and will

account for the tax credits transferred as part of income taxes. MGE will also include any expected proceeds from the transfer of tax credits in the evaluation of realizability of deferred tax assets related to tax credits and record a valuation allowance for the difference between the tax value of the credits and the expected proceeds. The PSCW approved the deferral by MGE of any differential between tax credit transfer proceeds and the tax value of credits reflected in rates to its next rate case filing.

#### 5. Pension and Other Postretirement Plans - MGE Energy and MGE.

MGE maintains qualified and nonqualified pension plans, health care, and life insurance benefits and defined contribution 401(k) benefit plans for its employees and retirees.

The components of net periodic benefit cost, other than the service cost component, are recorded in "Other income, net" on the consolidated statements of income. The service cost component is recorded in "Other operations and maintenance" on the consolidated statements of income. MGE has regulatory treatment and recognizes regulatory assets or liabilities for timing differences between when net periodic benefit costs are recovered and when costs are recognized.

The following table presents the components of net periodic benefit costs recognized.

|  | Three Mor<br>June |    | Six Months Ended June 30, |               |      |          |
|--|-------------------|----|---------------------------|---------------|------|----------|
| (In thousands)                           | 2024              |    | 2023                      | 2024          | 2023 |          |
| Pension Benefits                         |                   |    |                           |               |      |          |
| Components of net periodic benefit cost: |                   |    |                           |               |      |          |
| Service cost                             | \$<br>780         | \$ | 694                       | \$<br>1,539   | \$   | 1,446    |
| Interest cost                            | 4,315             |    | 4,337                     | 8,559         |      | 8,659    |
| Expected return on assets                | (7,148)           |    | (6,302)                   | (14,299)      |      | (12,624) |
| Amortization of:                         |                   |    |                           |               |      |          |
| Actuarial loss                           | 313               |    | 492                       | 429           |      | 880      |

| Net periodic benefit (credit) cost       | \$<br>170         | \$ | 314                       | \$<br>407     | \$   | 653      |

As approved by the PSCW, MGE is allowed to defer differences between actual employee benefit plan costs and costs reflected in current rates. The deferred costs may be recovered or refunded in MGE's next rate filing. During the three and six months ended June 30, 2024, MGE recovered \$1.2 million and \$2.6 million, respectively, of pension and other postretirement costs previously deferred. During the three and six months ended June 30, 2023, MGE deferred \$0.4 million and \$0.8 million, respectively, of pension and other postretirement costs. These costs have not been reflected in the table above.

#### 6. Equity and Financing Arrangements - MGE Energy.

#### a. Common Stock.

MGE Energy sells shares of its common stock through its Direct Stock Purchase and Dividend Reinvestment Plan (the Stock Plan). Those shares may be newly issued shares or shares that are purchased in the open market by an independent agent for participants in the Stock Plan. Sales of newly issued shares under the Stock Plan are covered by a shelf registration statement that MGE Energy filed with the SEC. During the three and six months ended June 30, 2024 and 2023, MGE Energy issued no new shares of common stock under the Stock Plan.

#### b. Dilutive Shares Calculation.

As of June 30, 2024, 22,937 shares were included in the calculation of diluted earnings per share related to nonvested equity awards. See Footnote 7 for additional information on share-based compensation awards.

#### 7. Share-Based Compensation - MGE Energy and MGE.

During the three and six months ended June 30, 2024, MGE recorded \$0.7 million and \$1.9 million, respectively, in compensation expense related to share-based compensation awards compared to \$0.7 million and \$1.8 million for the comparable periods in 2023.

In the first quarter of 2024, cash payments of \$2.5 million and 12,518 shares were distributed related to awards that were granted in 2021 under the 2021 Incentive Plan and 2019 under the 2006 Performance Unit Plan.

In March 2024, MGE issued 16,414 performance units and 29,733 restricted stock units under the 2021 Incentive Plan to eligible employees and non-employee directors.

MGE recognizes stock-based compensation expense on a straight-line basis over the requisite service period. Awards classified as equity awards are measured based on their grant-date fair value. Awards classified as liability awards are recorded at fair value each reporting period. The performance units can be paid out in either cash, shares of common stock, or a combination of cash and stock and are classified as a liability award. The restricted stock units will be paid out in shares of common stock, and therefore are classified as equity awards.

# 8. Commitments and Contingencies - MGE Energy and MGE.

#### a. Environmental.

In February 2021, MGE and the other co-owners of Columbia announced plans to retire that facility. The co-owners intend to retire Unit 1 and Unit 2 by June 2026. Final timing and unit retirement dates are subject to change depending on operational, regulatory, and other factors. Effects of the environmental compliance requirements discussed below will depend upon the final Columbia retirement dates approved, applicable regulations at that time, and required compliance dates.

MGE Energy and MGE are subject to frequently changing local, state, and federal regulations concerning air quality, water quality, land use, threatened and endangered species, hazardous materials handling, and solid waste disposal. These regulations affect the manner in which operations are conducted, the costs of operations, as well as capital and operating expenditures. Several of these environmental rules are subject to legal challenges, reconsideration and/or other uncertainties. Regulatory initiatives, proposed rules, and court challenges to adopted rules could have a material effect on capital expenditures and operating costs. Management believes compliance costs will be recovered in future rates based on previous treatment of environmental compliance projects.

These initiatives, proposed rules, and court challenges include:

The United States Environmental Protection Agency's (EPA) promulgated water Effluent Limitations
Guidelines (ELG) and standards for steam electric power plants that focus on the reduction of
metals and other pollutants in wastewater from new and existing power plants.

With the closure of the wet pond system in 2023 (as described in further detail in the CCR section below), Columbia complies with ELG requirements. With the installation of additional wastewater treatment equipment completed in 2023, the Elm Road Units comply with ELG requirements.

In May 2024, the EPA finalized the ELG rule that further regulates the wastewater discharges associated with coal-fired power plants. The rule focuses on wastewater discharges from flue gas

desulfurization and bottom ash transport water. The rule includes a reduction in requirements for plants that have already installed pollution controls based on previous versions of the rule, and for plants that will be retiring or switching to natural gas by certain dates. The operator of the Elm Road Units believes that pollution prevention installed under previous versions of the rule and the planned fuel switching will qualify the Elm Road Units for the reduced requirements. MGE and the operator of the Elm Road Units currently are evaluating the final rule.

The EPA's cooling water intake rule requires cooling water intake structures at electric power
plants to meet best technology available (BTA) standards to reduce the mortality from entrainment
(drawing aquatic life into a plant's cooling system) and impingement (trapping aquatic life on
screens).

Blount received its most recent Wisconsin Pollutant Discharge Elimination System (WPDES) permit from the Wisconsin Department of Natural Resources (WDNR) in October 2023. Blount's latest WPDES permit assumes that the plant meets BTA standards for entrainment for the duration of this permit which expires in 2028. The WDNR included a requirement to conduct an impingement study in the latest permit which needs to be completed by the end of 2027. Once the WDNR determines the impingement requirements at Blount, MGE will be able to determine any compliance costs of meeting Blount's permit requirements.

Intakes at Columbia are subject to this rule. The Columbia operator's most recent permit required that studies of intake structures be submitted to the WDNR by November 2023 to help determine BTA. Columbia's permit renewal application is due in 2024 and in November 2023 the Columbia operator timely submitted its renewal application to the WDNR. BTA improvements required by the renewal permit will be coordinated with the owners' plan to retire both units by June of 2026. MGE will continue to work with Columbia's operator to evaluate regulatory requirements in light of the planned retirement. MGE does not expect this rule to have a material effect on Columbia.

Greenhouse Gas (GHG) new source performance standards and emission guidelines established
under the Clean Air Act for states to use in developing plans to control GHG emissions from fossil
fuel-fired electric generating units, including existing and proposed regulations governing existing,
new, or modified fossil-fuel generating units.

In May 2024, the EPA published its final performance standards and emission guidelines under section 111(b) of the Clean Air Act for carbon dioxide emissions from new combustion turbines and existing fossil-fuel fired boilers used to produce electricity. The final rule grants some emissions flexibility for existing coal-fired units that retire and/or fuel switch by certain dates. For existing natural gas boiler units, the final rule establishes a process where states must submit plans to the EPA for establishing standards. States will have two years from the publication date of these rules to submit plans to the EPA for review and approval. The EPA has indicated that it is separately developing performance standards and emission guidelines for GHG emissions from existing natural gas-fired combustion turbines. Our preliminary evaluation of the final ruling shows that MGE meets the requirements for our gas-fired boilers at Blount. Furthermore, MGE will meet the requirements for our coal-fired units at Columbia through planned unit retirements and the Elm Road Units through its transition to natural gas. MGE will monitor for upcoming rulemaking planned for gas-fired combustion turbines.

 The EPA's rule to regulate ambient levels of ozone through the 2015 Ozone National Ambient Air Quality Standards (NAAQS).

The Elm Road Units are located in Milwaukee County, Wisconsin, a "moderate" nonattainment area for the 2015 Ozone NAAQS. The deadline for moderate classified areas to meet attainment standards is August 2024. At this time, the operator of the Elm Road Units does not expect that the 2015 Ozone NAAQS or the Milwaukee County nonattainment designation will have a material effect on the Units.

The EPA's rule to regulate Fine Particulate Matter (PM2.5).

In March 2024, the EPA published a final rule to lower the average annual PM2.5 NAAQS from 12 ug/m3 to 9 ug/m3 effective May 2024. The new annual PM2.5 NAAQS could impact Milwaukee County, where our Elm Road units are located, if the county is determined to be in nonattainment. A nonattainment designation would require the State of Wisconsin to develop a plan to get into attainment, which would likely include additional limitations for new and modified plants in the county. With the planned transition of the Elm Road Units to natural gas, there is a low probability for the need of additional emission limitations. However, we will not know the impact of this rule until PM data from 2023 and 2024 is evaluated and released, the EPA determines the attainment status of Wisconsin counties, and the State of Wisconsin develops an attainment implementation plan. MGE will continue to follow the rule's developments.

• Rules regulating nitrogen oxide (NO<sub>x</sub>) and sulfur dioxide (SO<sub>2</sub>) emissions, including the Cross State Air Pollution Rule (CSAPR) and Clean Air Visibility Rule.

The EPA's CSAPR and its progeny are a suite of interstate air pollution transport rules designed to reduce ozone and PM2.5 ambient air levels in areas that the EPA has determined as being significantly impacted by pollution from upwind states. This is accomplished through a reduction in  $NO_x$  and  $SO_2$  from qualifying fossil-fuel fired power plants and industrial boilers in upwind "contributing" states.  $NO_x$  and  $SO_2$  contribute to fine particulate pollution and  $NO_x$  contributes to ozone formation in downwind areas. Reductions are generally achieved through a cap-and-trade system. Individual plants can meet their caps through reducing emissions and/or buying allowances on the market.

In March 2023 (published June 2023), the EPA finalized its Federal Implementation Plan to address state obligations under the Clean Air Act "good neighbor" provisions for the 2015 Ozone NAAQS (FIP Rule). The FIP Rule impacts 23 states, including Wisconsin. For Wisconsin, the FIP Rule includes revisions to the current obligations for fossil-fuel power generation, which includes Blount, Columbia, the Elm Road Units, WCCF, West Riverside, and West Marinette. Emissions budgets can be met with planned retirements, fuel switching, and immediately available measures, including consistently operating emissions controls already installed at power plants. In 2026, additional obligations would go into effect, including a further reduction in emissions budgets. Wisconsin would need to submit a State Implementation Plan to meet its obligations or accept the EPA's FIP Rule. Legal challenges to the FIP Rule are pending in the United States Court of Appeals for the District of Columbia. In June 2024, the Supreme Court of the United States granted a request to stay the FIP Rule pending judicial review by the US Court of Appeals for the District of Columbia on the merits of petitioner's challenges to implementation of the rule. Based on our current evaluation, if the FIP Rule were to go into effect, the 2026 additional emission reductions may impact the Elm Road Units and additional upgrades may be needed to comply, however, we will not know the final impact until final decisions are issued in the pending litigation.

• The EPA's Coal Combustion Residuals (CCR) Rule.

The CCR rule regulates the disposal of solid waste coal ash and defines what ash use activities would be considered generally exempt beneficial reuse of coal ash. The CCR rule also regulates landfills, ash ponds, and other surface impoundments used for coal combustion residuals by regulating their design, location, monitoring, and operation. The CCR rule requires owners and operators of coal-fired power plants to stop transporting CCR and non-CCR wastewater to unlined surface impoundments. With the coal combustion residuals system that replaced the unlined surface impoundment completed in 2023, Columbia complies with this rule.

In May 2024, the EPA published its final CCR Legacy Rule. The CCR Legacy Rule applies to previous closed disposal sites. In June 2024, MGE recorded \$23.7 million asset retirement obligation for its estimated share of the legal liability associated with the effect of the CCR Legacy Rule for remediation and groundwater compliance monitoring. Actual costs of compliance may be different

than the amount recorded due to potential changes in compliance strategies that will be used, as well as other potential changes in cost estimate.

# b. Legal Matters.

MGE is involved in various legal matters that are being defended and handled in the normal course of business. MGE accrues for costs that are probable of being incurred and subject to reasonable estimation. The accrued amount for these matters is not material to the financial statements. MGE does not expect the resolution of these matters to have a material adverse effect on its consolidated results of operations, financial condition, or cash flows.

Several environmental groups filed petitions against the PSCW challenging the fixed customer charge set in MGE's 2022/2023 rate settlement, 2023 electric limited reopener, and 2024/2025 rate order. MGE has intervened in the petitions in cooperation with the PSCW. See Footnote 9.a. for more information regarding this matter.

#### c. Purchase Contracts.

MGE Energy and MGE have entered into various commodity supply, transportation, and storage contracts to meet their obligations to deliver electricity and natural gas to customers. Management expects to recover these costs in future customer rates. The following table shows future commitments related to purchase contracts as of June 30, 2024:

| (In thousands)             | 2024     | 2025     | 2026     | 2027    | 2028    | Thereafter |
|----------------------------|----------|----------|----------|---------|---------|------------|
| Natural gas <sup>(a)</sup> | \$22,421 | \$40,762 | \$15,492 | \$2,546 | \$2,546 | \$11,224   |

(a) MGE's natural gas transportation and storage contracts require fixed monthly payments for firm supply pipeline transportation and storage capacity. The pricing components of the fixed monthly payments for the transportation and storage contracts are approved by FERC but may be subject to change. MGE's natural gas supply commitments include market-based pricing.

# 9. Rate Matters - MGE Energy and MGE.

# Rate Proceedings.

|               |   | Common Equity Component of   |  |
|---------------|---|--|--|
|               | Return on                                 | Regulatory   |  |
| Rate increase | Common Equity                             | Capital Structure  | Effective Date   |

| 1.54%         | 9.7%                                      | 56.1%  | 1/1/2024   |
| 2.44%         | 9.7%                                      | 56.1%  | 1/1/2024   |
| 4.17%         | 9.7%                                      | 56.1%  | 1/1/2025   |
| 1.32%         | 9.7%                                      | 56.1%  | 1/1/2025   |
|               | 0.96%<br>9.01%<br>1.54%<br>2.44%<br>4.17% | Rate increase         Common Equity           0.96%         9.8%           9.01%         9.8%           1.54%         9.7%           2.44%         9.7%           4.17%         9.7% | Rate increase         Return on Common Equity         Component of Regulatory Capital Structure           0.96%         9.8%         55.6%           9.01%         9.8%         55.6%           1.54%         9.7%         56.1%           2.44%         9.7%         56.1%           4.17%         9.7%         56.1% |

- (a) The electric rate increase was driven by generation assets including our investments in Badger Hollow II (solar), Paris (solar and battery), Red Barn Wind Farm (wind), and West Riverside (natural gas). In addition, the reopener request included an increase in fuel costs and the recovery of deferred 2021 fuel costs. The reopener also revised the depreciation schedule for Columbia Unit 2 and shared equipment to 2029 to align with the depreciation schedule for Unit 1.
- (b) The electric increase was driven by an increase in rate base including our investments made in West Riverside, local solar, and continued investment in grid modernization, as well as higher costs for transmission, pension and OPEB, and uncollectible costs (including costs previously deferred from prior years). This increase in electric costs is offset by a decrease in fuel costs and benefit from lower tax expense (including impacts from the Inflation Reduction Act). MGE filed an updated 2025 fuel forecast with the PSCW in 2024, which will impact rates in 2025, based on any variance between the forecast submitted as part of the rates and updated forecast. In addition, the PSCW authorized MGE to defer a recovery of and a return on costs associated for any change in the in service date for Paris and Darien and force majeure costs for Badger Hollow II, Paris, and Darien that were not reflected in this rate filing. The PSCW also approved deferral of any differential in PTC tax credits

reflected in rates and actual credits produced. These deferrals will be reflected in MGE's next rate case filing. The gas rate increases were also driven by our investment made in grid modernization and higher pension and OPEB and uncollectible costs (including costs previously deferred from prior years). This increase in gas costs is offset by a tax benefit related to excess deferred taxes. Included in the gas residential rate is a reduction in the customer fixed charge.

- (c) In accordance with the 2024/2025 rate order from the PSCW, MGE will have an earnings sharing mechanism, under which, if MGE earns above the authorized Return on Equity (ROE) in the rate order: (i) the utility will retain 100.0% of earnings for the first 15 basis points above the authorized ROE; (ii) 50.0% of the next 60 basis points will be required to be deferred and returned to ratepayers; and (iii) 100.0% of any remaining excess earnings will be required to be refunded to ratepayers. The earnings calculation excludes fuel rules adjustments. See "Fuel Rules" below.
- (d) MGE filed a 2025 Fuel Cost Plan with the PSCW in June 2024. The plan would lower the 2025 increase in electric rates to 2.47% to reflect lower expected fuel costs. MGE expects a final decision from the PSCW on the Fuel Cost Plan by the end of 2024.

Sierra Club and Vote Solar have filed petitions with the Dane County Circuit Court seeking review of the PSCW decisions approving MGE's electric and gas 2022/2023 rate settlement, 2023 electric limited reopener, and 2024/2025 rate order. The PSCW is named as the responding party; MGE is not named as a party. The Petitions challenge the amount of customer fixed charge that does not vary with usage. The requested relief is unclear. The revenue requirement approved by the PSCW in the settlement, limited reopener, and 2024/2025 rate order have not been challenged. The PSCW is expected to vigorously defend its approval of the rate case settlement, limited reopener, and the 2024/2025 rate order. MGE has intervened in the proceedings to further defend the PSCW's decision. The Dane County Circuit Court affirmed the PSCW's decision to approve the 2022/2023 rate settlement, and Sierra Club and Vote Solar appealed that decision to the Wisconsin Court of Appeals. On August 6, 2024, the Wisconsin Court of Appeals denied Sierra Club and Vote Solar's appeal and affirmed the PSCW's approval of the 2022/2023 rate settlement. It is not yet known whether Sierra Club and Vote Solar will pursue an appeal to the Wisconsin Supreme Court. The petitions challenging the 2023 electric limited reopener and the 2024/2025 rate order remain stayed pending further proceedings.

#### b. Fuel Rules.

Fuel rules require Wisconsin utilities to defer electric fuel-related costs that fall outside a symmetrical cost tolerance band around the amount approved for a utility in its annual fuel proceedings. Any overor under-recovery of the actual costs is determined in the following year and is then reflected in future billings to electric retail customers. The fuel rules bandwidth is set at plus or minus 2% in 2024 and 2023. The electric fuel-related costs are subject to an excess revenues test. Excess revenues are defined as revenues in the year in question that provide MGE with a greater return on common equity than authorized by the PSCW in MGE's latest rate order. The recovery of under-collected electric fuel-related costs would be reduced by the amount that exceeds the excess revenue test. These costs are subject to the PSCW's annual review of fuel costs completed in the year following the deferral. The following table summarizes deferred electric fuel-related costs:

|      | Fuel Costs (Savings) (in millions) | Refund or Recovery Period           |
|------|------------------------------------|-------------------------------------|
| 2021 | \$3.3 <sup>(a)</sup>               | January 2023 through December 2023  |
| 2022 | \$8.8 <sup>(a)</sup>               | October 2023 through September 2024 |
| 2023 | (\$7.2) <sup>(a)</sup>             | October 2024 through December 2024  |

(a) There was no change to the refund or recovery in the fuel rules proceedings from the amount MGE deferred.

#### 10. Derivative and Hedging Instruments - MGE Energy and MGE.

#### a. Purpose.

As part of its regular operations, MGE enters into contracts, including options, swaps, futures, forwards, and other contractual commitments, to manage its exposure to commodity prices. To the extent that these contracts are derivatives, MGE assesses whether or not the normal purchases or normal sales exclusion applies. For contracts to which this exclusion cannot be applied, the derivatives are recognized in the consolidated balance sheets at fair value. MGE's financial commodity derivative activities are conducted in accordance with its electric and gas risk management program, which is approved by the PSCW and limits the volume MGE can hedge with specific risk management strategies. The maximum length of time over which cash flows related to energy commodities can be hedged is

four years. If the derivative qualifies for regulatory deferral, the derivatives are marked to fair value and are offset with a corresponding regulatory asset or liability depending on whether the derivative is in a net loss or net gain position, respectively. The deferred gain or loss is recognized in earnings in the delivery month applicable to the instrument. Gains and losses related to hedges qualifying for regulatory treatment are refundable or recoverable in gas rates through the Purchased Gas Adjustment (PGA) or in electric rates as a component of the fuel rules mechanism.

#### b. Notional Amounts.

The gross notional volume of open derivatives is as follows:

|                                | June 30, 2 | 2024 | December 33 | 1, 2023 |
|--------------------------------|------------|------|-------------|---------|
| Commodity derivative contracts | 300,240    | MWh  | 392,000     | MWh     |
| Commodity derivative contracts | 6,090,000  | Dth  | 7,180,000   | Dth     |
| FTRs                           | 4,606      | MW   | 1,824       | MW      |

#### c. Financial Statement Presentation.

MGE purchases and sells exchange-traded and over-the-counter options, swaps, and future contracts. These arrangements are primarily entered into to help stabilize the price risk associated with gas or power purchases. These transactions are employed by both MGE's gas and electric segments. Additionally, as a result of the firm transmission agreements that MGE holds on electricity transmission paths in the MISO market, MGE holds financial transmission rights (FTRs). An FTR is a financial instrument that entitles the holder to a stream of revenues or charges based on the differences in hourly day-ahead energy prices between two points on the transmission grid. The fair values of these instruments are offset with a corresponding regulatory asset/liability depending on whether they are in a net loss/gain position. Depending on the nature of the instrument, the gain or loss associated with these transactions will be reflected as cost of gas sold, fuel for electric generation, or purchased power expense in the delivery month applicable to the instrument. As of June 30, 2024, and December 31, 2023, the cost basis of exchange traded derivatives and FTRs exceeded their fair value by \$1.9 million and \$5.2 million, respectively.

The following table summarizes the fair value of the derivative instruments on the consolidated balance sheets. All derivative instruments in this table are presented on a gross basis and are calculated prior to the netting of instruments with the same counterparty under a master netting agreement as well as the netting of collateral. For financial statement purposes, instruments are netted with the same counterparty under a master netting agreement as well as the netting of collateral.

|   | D  | erivative | Derivative |             |                                      |

| Commodity derivative contracts <sup>(a)</sup> | \$ | 263       | \$         | 4,942       | Other current liabilities            |
| Commodity derivative contracts <sup>(a)</sup> |    | 156       |            | 882         | Other deferred liabilities and other |
| FTRs  |    | 179       |            | _           | Other current assets                 |

<sup>(</sup>a) As of June 30, 2024, and December 31, 2023, collateral of \$2.0 million and \$5.4 million, respectively, was posted against and netted with derivative liability positions on the consolidated balance sheets. The fair value of the derivative liability disclosed in this table has not been reduced for the collateral posted.

The following table shows the effect of netting arrangements for recognized derivative assets and liabilities that are subject to a master netting arrangement or similar arrangement on the consolidated balance sheets.

|                                |             |         |           |       |          |           |    |           |

MGE's commodity derivative contracts and FTRs are subject to regulatory deferral. These derivatives are marked to fair value and are offset with a corresponding regulatory asset or liability. Realized gains and losses are deferred on the consolidated balance sheets and are recognized in earnings in the delivery month applicable to the instrument. As a result of the treatment described above, there are no unrealized gains or losses that flow through earnings.

Certain counterparties extend MGE a credit limit. If MGE exceeds these limits, the counterparties may require collateral to be posted. As of June 30, 2024, and December 31, 2023, no counterparties were in a net liability position.

Nonperformance of counterparties to the non-exchange traded derivatives could expose MGE to credit loss. However, MGE enters into transactions only with companies that meet or exceed strict credit guidelines, and it monitors these counterparties on an ongoing basis to mitigate nonperformance risk in its portfolio. As of June 30, 2024, no counterparties had defaulted.

#### 11. Fair Value of Financial Instruments - MGE Energy and MGE.

Fair value is defined as the price that would be received to sell an asset or would be paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. The accounting standard clarifies that fair value should be based on the assumptions market participants would use when pricing the asset or liability including assumptions about risk. The standard also establishes a three-level fair value hierarchy based upon the observability of the assumptions used and requires the use of observable market data when available. The levels are:

Level 1 - Pricing inputs are quoted prices within active markets for identical assets or liabilities.

Level 2 - Pricing inputs are quoted prices within active markets for similar assets or liabilities; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations that are correlated with or otherwise verifiable by observable market data.

Level 3 - Pricing inputs are unobservable and reflect management's best estimate of what market participants would use in pricing the asset or liability.

# a. Fair Value of Financial Assets and Liabilities Recorded at the Carrying Amount.

The carrying amount of cash, cash equivalents, and outstanding commercial paper approximates fair market value due to the short maturity of those investments and obligations. The estimated fair market value of long-term debt is based on quoted market prices for similar financial instruments. Since long-term debt is not traded in an active market, it is classified as Level 2. The estimated fair market value of financial instruments are as follows:

|                               | June 30    | , 2024     | December   | r 31, 2023 |
|-------------------------------|------------|------------|------------|------------|
|                               | Carrying   |            | Carrying   |            |
| (In thousands)                | Amount     | Fair Value | Amount     | Fair Value |
| Long-term debt <sup>(a)</sup> | \$ 725,990 | \$ 658,486 | \$ 728,546 | \$ 675,922 |

(a) Includes long-term debt due within one year. Excludes debt issuance costs and unamortized discount of \$4.3 million and \$4.6 million as of June 30, 2024, and December 31, 2023, respectively.

# b. Recurring Fair Value Measurements.

The following table presents the balances of assets and liabilities measured at fair value on a recurring basis.

|  | Fair Value as of June 30, 2024 |   |                      |  |  |                      |          |   |

<sup>(</sup>b) As of June 30, 2024, and December 31, 2023, collateral of \$2.0 million and \$5.4 million, respectively, was posted against and netted with derivative liability positions on the consolidated balance sheets. The fair value of the derivative liability disclosed in this table has not been reduced for the collateral posted.

**Exchange-traded Investments.** Investments include exchange-traded investment securities valued using quoted prices on active exchanges and are therefore classified as Level 1.

**Deferred Compensation.** The deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. These amounts are included within "Other deferred liabilities and other" in the consolidated balance sheets. The value of certain deferred compensation obligations is based on the market value of the participants' notional investment accounts. The underlying notional investments are comprised primarily of equities, mutual funds, and fixed income

securities which are based on directly and indirectly observable market prices. Since the deferred compensation obligations themselves are not exchanged in an active market, they are classified as Level 2.

The value of legacy deferred compensation obligations are based on notional investments that earn interest based upon the semiannual rate of U.S. Treasury Bills having a 26-week maturity increased by 1% compounded monthly with a minimum annual rate of 7%, compounded monthly. The notional investments are based upon observable market data, however, since the deferred compensation obligations themselves are not exchanged in an active market, they are classified as Level 2.

**Derivatives.** Derivatives include exchange-traded derivative contracts, over-the-counter transactions and FTRs. Most exchange-traded derivative contracts are valued based on unadjusted quoted prices in active markets and are therefore classified as Level 1. A small number of exchange-traded derivative contracts are valued using quoted market pricing in markets with insufficient volumes and are therefore considered unobservable and classified as Level 3. Transactions done with an over-the-counter party are on inactive markets and are therefore classified as Level 3. These transactions are valued based on quoted prices from markets with similar exchange-traded transactions. FTRs are priced based upon monthly auction results for identical or similar instruments in a closed market with limited data available and are therefore classified as Level 3.

The following table summarizes the changes in Level 3 commodity derivative assets and liabilities measured at fair value on a recurring basis.

|   | Three Months Ended<br>June 30, |    |         |    | Six Mont<br>June | <br>          |

| Settlements                             | 1,330                          |    | 903     |    | 3,855            | 5,574         |
| Balance as of June 30,                  | \$<br>(1,432)                  | \$ | (2,892) | \$ | (1,432)          | \$<br>(2,892) |

The following table presents total realized and unrealized gains (losses) included in income for Level 3 assets and liabilities measured at fair value on a recurring basis<sup>(c)</sup>.

|                         | Three Mor     | nths Ended |    | Six Mont | inded |         |
|-------------------------|---------------|------------|----|----------|-------|---------|
|                         | June 30,      |            |    | June     | 30,   |         |
| (In thousands)          | 2024          | 2023       |    | 2024     |       | 2023    |
| Purchased power expense | \$<br>(1,330) | \$ (903)   | \$ | (3,855)  | \$    | (5,574) |

(c) MGE's exchange-traded derivative contracts, over-the-counter party transactions, and FTRs are subject to regulatory deferral. These derivatives are therefore marked to fair value and are offset in the financial statements with a corresponding regulatory asset or liability.

# 12. Joint Plant Construction Project Ownership - MGE Energy and MGE

MGE has ownership interests in generation projects with other co-owners, some of which are under construction, as shown in the following table. Incurred costs are reflected in "Property, plant, and equipment, net" or "Construction work in progress" on the consolidated balance sheets.

|                           |           |               |             | Share of                    |                                 | Estimated Date of |
|---------------------------|-----------|---------------|-------------|-----------------------------|---------------------------------|-------------------|
|                           | Ownership |               | Share of    | Estimated                   | Costs incurred as               | Commercial        |
| Project                   | Interest  | Source        | Generation  | Costs <sup>(a)</sup>        | of June 30, 2024 <sup>(a)</sup> | Operation         |
| Paris <sup>(b)</sup>      | 10%       | Solar/Battery | 20 MW/11 MW | \$61 million <sup>(d)</sup> | \$40.2 million                  | 2024 Solar        |
|                           |           |               |             |                             |                                 | 2025 Battery      |
| Darien <sup>(c)</sup>     | 10%       | Solar         | 25 MW       | \$48 million(d)(e)          | \$37.6 million                  | 2024              |
| Koshkonong <sup>(f)</sup> | 10%       | Solar         | 30 MW       | \$65 million(d)(e)          | \$0.1 million                   | 2026              |
| West Riverside            | 3.5%      | Natural Gas   | 25 MW       | \$25 million                | \$25.2 million                  | (g)               |

- (a) Excluding AFUDC.
- (b) Paris Solar-Battery Park is located in the Town of Paris in Kenosha County, Wisconsin.
- (c) Darien Solar Energy Center is located in Walworth and Rock Counties in southern Wisconsin.
- (d) Estimated costs are expected to exceed PSCW previously approved Certificate of Authority (CA) levels. Notifications are provided to the PSCW when costs increase above CA levels. MGE has and will continue to request recovery of the updates in its rate case proceedings.
- (e) As part of its order, the PSCW approved battery capacity with this project, which is no longer included in the current estimate. We will continue to evaluate timing, cost, and feasibility of the installation of batteries.
- (f) Koshkonong Solar Energy Center is located in the Towns of Christiana and Deerfield in Dane County, Wisconsin.
- (g) In June 2024, MGE purchased an additional ownership interest in West Riverside, a natural gas-fired facility located in Beloit, WI, from WPL, operator and co-owner of the plant. West Riverside was placed in-service in 2020. MGE's interest in West Riverside increased to 6.9%.

MGE received specific approval to recover 100% AFUDC on Paris, Darien, and Koshkonong. During the three and six months ended June 30, 2024, MGE recognized \$1.5 million and \$2.7 million, respectively, after tax, in AFUDC for these projects compared to \$0.6 million and \$1.0 million for the comparable periods in 2023.

# 13. Revenue - MGE Energy and MGE.

Revenues disaggregated by revenue source were as follows:

|                               | Three Months Ended |         |      |         |    | Six Months Ended |    |         |  |

# 14. Segment Information - MGE Energy and MGE.

MGE Energy operates in the following business segments: electric utility, gas utility, nonregulated energy, transmission investment, and all other. See the 2023 Annual Report on Form 10-K for additional discussion of each of these segments.

| (In thousands) MGE Energy         |    | Electric |     | Gas     |   | Non-Regulated<br>Energy |    | ransmission<br>nvestment | All Others | Consolida<br>Eliminat | ,      | Co    | nsolidated<br>Total |

# Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

#### General

MGE Energy is an investor-owned public utility holding company operating through subsidiaries in five business segments:

- Regulated electric utility operations, conducted through MGE, which generate and distribute electricity to approximately 163,000 customers in Dane County, Wisconsin,
- Regulated gas utility operations, conducted through MGE, which distribute natural gas to approximately 176,000 customers in seven south-central and western Wisconsin counties,
- Nonregulated energy operations, conducted through MGE Power and its subsidiaries, which owns interests in electric generating capacity that is leased to MGE,
- Transmission investments, representing our equity investment in ATC, which owns and operates electric transmission facilities primarily in Wisconsin, and ATC Holdco, a company created to facilitate out-of-state electric transmission development and investments, and
- All other, which includes corporate operations and services.

MGE will continue to focus on growing earnings while controlling operating and fuel costs. MGE's goal is to provide safe and efficient operations in addition to providing customer value. We believe it is critical to maintain a strong credit rating consistent with financial strength in MGE in order to accomplish these goals.

The ownership/leasing structure for our nonregulated energy operations was adopted under applicable state regulatory guidelines for MGE's participation in these generation facilities, consisting principally of a stable return on the equity investment in the new generation facilities over the term of the related leases. The nonregulated energy operations include an ownership interest in two coal-fired generating units in Oak Creek, Wisconsin and a partial ownership of a cogeneration project on the University of Wisconsin-Madison campus. A third party operates the units in Oak Creek, and MGE operates the cogeneration project. Due to the nature of MGE's participation in these facilities, the results of MGE Energy's nonregulated operations are also consolidated into MGE's consolidated financial position and results of operations under applicable accounting standards.

#### **Executive Overview**

We principally earn revenue and generate cash from operations by providing electric and natural gas utility services, including electric power generation and electric power and gas distribution. The earnings and cash flows from the utility business are sensitive to various external factors, including:

- Weather, and its impact on customer sales,
- Economic conditions, including current business activity and employment and their impact on customer demand
- Regulation and regulatory issues, and their impact on the timing and recovery of costs,
- Energy commodity prices, including natural gas prices,
- Equity price risk pertaining to pension related assets,
- Credit market conditions, including interest rates and our debt credit rating,
- Environmental laws and regulations, including adopted and pending environmental rule changes, and
- Other factors listed in "Item 1A. Risk Factors" in our 2023 Annual Report on Form 10-K.

During the three months ended June 30, 2024, MGE Energy's earnings were \$23.8 million or \$0.66 per share compared to \$28.7 million or \$0.79 per share during the same period in the prior year. MGE's earnings during the three months ended June 30, 2024, were \$16.0 million compared to \$22.2 million during the same period in the prior year.

During the six months ended June 30, 2024, MGE Energy's earnings were \$57.6 million or \$1.59 per share compared to \$59.8 million or \$1.65 per share during the same period in the prior year. MGE's earnings during the six months ended June 30, 2024, were \$42.6 million compared to \$46.4 million during the same period in the prior year.

MGE Energy's net income was derived from our business segments as follows:

|                          | Three Months Ended |    |       |          | Six Month | ded |       |
|--------------------------|--------------------|----|-------|----------|-----------|-----|-------|

| Business Segment:        | 2024               |    | 2023  |          | 2024      |     | 2023  |
| Electric Utility         | \$<br>15.6         | \$ | 21.6  | \$       | 31.4      | \$  | 34.9  |
| Gas Utility              | 0.1                |    | 0.6   |          | 10.7      |     | 11.4  |
| Nonregulated Energy      | 6.1                |    | 5.4   |          | 11.9      |     | 11.0  |
| Transmission Investments | 2.0                |    | 1.9   |          | 4.0       |     | 3.8   |
| All Other                | _                  |    | (8.0) |          | (0.4)     |     | (1.3) |
| Net Income               | \$<br>23.8         | \$ | 28.7  | \$       | 57.6      | \$  | 59.8  |

Our net income during the three and six months ended June 30, 2024, compared to the same periods in the prior year primarily reflects the effects of the following factors:

#### Electric Utility

Unfavorable weather during 2024 has contributed to lowered electric earnings. Electric residential sales decreased approximately 4% during both the three and six months ended June 30, 2024, compared to the same periods in the prior year. Also contributing to lowered electric earnings is increased fuel costs during 2024 compared to the 2024 fuel cost plan approved by the PSCW. An increase in electric investments contributed to earnings for the three and six months ended June 30, 2024.

#### Gas Utility

Lower gas retail sales resulting from warmer than normal weather in the first quarter of 2024 contributed to lower gas earnings for the six months ended June 30, 2024. Gas retail sales decreased approximately 8%. Heating degree days (a measure for determining the impact of weather during the heating season) decreased by approximately 9% in the first six months of 2024 compared to the same period in the prior year.

# **Significant Events**

The following events affected the first six months of 2024:

2024/2025 Rate Proceeding: In December 2023, the PSCW approved a 1.54% increase to electric rates and 2.44% increase to gas rates for 2024. The PSCW also approved a 4.17% increase to electric rates and 1.32% increase to gas rates in 2025. MGE filed a 2025 Fuel Cost Plan with the PSCW in June 2024. The plan would lower the 2025 increase in electric rates to 2.47%, reflecting lower expected fuel costs. MGE expects a final decision from the PSCW on the Fuel Cost Plan by the end of 2024. See "Other Matters" below for additional information on the 2024/2025 rate proceeding.

In accordance with the 2024/2025 rate order from the PSCW, MGE will have an earnings sharing mechanism, under which, if MGE earns above the 9.7% ROE authorized in the rate order: (i) the utility will retain 100% of earnings for the first 15 basis points above the authorized ROE; (ii) 50% of the next 60 basis points will be required to be deferred and returned to customers; and (iii) 100% of any remaining excess earnings will be required to be refunded to customers. The earnings calculation excludes fuel rules adjustments.

Large Scale Utility Projects: Large scale generation projects under construction, are shown in the following table. Incurred costs are reflected in "Construction work in progress" for projects under construction on the consolidated balance sheets.

|                          | Ownership |               | Share of    | Share of<br>Estimated       | Costs incurred as of         | Estimated Date of<br>Commercial |
|--------------------------|-----------|---------------|-------------|-----------------------------|------------------------------|---------------------------------|
| Project                  | Interest  | Source        | Generation  | Costs <sup>(a)</sup>        | June 30, 2024 <sup>(a)</sup> | Operation                       |
| Paris                    | 10%       | Solar/Battery | 20 MW/11 MW | \$61 million <sup>(c)</sup> | \$40.2 million(b)            | 2024 Solar                      |
|                          |           |               |             |                             |                              | 2025 Battery                    |
| Darien                   | 10%       | Solar         | 25 MW       | \$48 million(c)(d)          | \$37.6 million(b)            | 2024                            |
| High Noon <sup>(e)</sup> | 10%       | Solar         | 30 MW       | \$65 million                | \$1.0 million                | 2026                            |
| Koshkonong               | 10%       | Solar         | 30 MW       | \$65 million(c)(d)          | \$0.1 million                | 2026                            |
| Sunnyside <sup>(f)</sup> | 100%      | Solar/Battery | 20MW/40MW   | \$112 million               | \$0.9 million                | 2026 Solar<br>2027 Battery      |

- (a) Excluding AFUDC.
- (b) MGE received specific approval to recover 100% AFUDC. After tax, MGE recognized \$3.3 million and \$1.4 million of AFUDC equity through June 30, 2024, on Paris and Darien, respectively, during construction. AFUDC has been excluded from the costs incurred in the table above.
- (c) Estimated costs are expected to exceed PSCW previously approved CA levels. Notifications are provided to the PSCW when costs increase above CA levels. MGE has and will continue to request recovery of the updates in its rate case proceedings.
- (d) As part of its order, the PSCW approved battery capacity with this project, which is no longer included in the current estimate. We will continue to evaluate timing, cost, and feasibility of the installation of batteries.
- (e) Pending approval by the PSCW. Battery storage has been proposed as part of this project and has not been included in the 2024-2028 forecast. MGE will continue to evaluate timing, cost, and feasibility of the installation of batteries.
- (f) Pending approval by the PSCW.

In the near term, several items may affect us, including:

2023 Annual Fuel Proceeding: MGE had fuel savings in 2023. As of December 31, 2023, MGE had deferred \$7.2 million of 2023 fuel savings. The PSCW has completed the annual review of 2023 fuel costs and approved for MGE to return these savings over a 3-month period from October 2024 through December 2024. There was no change to the costs to be refunded in the fuel rule proceedings from the amount MGE deferred in the previous year.

ATC ROE: As discussed in "Other Matters" below, ATC's authorized ROE, which is used in calculating its rates and revenues, is the subject of a challenge before Federal Energy Regulatory Commission (FERC). A decrease in ATC's ROE could result in lower equity earnings and distributions from ATC in the future. We derived approximately 6.7% and 6.2% of our net income during the six months ended June 30, 2024 and 2023, respectively, from our investment in ATC.

Environmental Initiatives: There are proposed legislative rules and initiatives involving matters related to air emissions, water effluent, hazardous materials, and greenhouse gases, all of which affect generation plant capital expenditures and operating costs as well as future operational planning. Legislation and rulemaking addressing climate change and related matters could significantly affect the costs of owning and operating fossil-fueled generating plants. We would expect to seek and receive recovery of any such costs in rates. However, it is difficult to estimate the amount of such costs due to the uncertainty as to the timing and form of any legislation or rules, the timing and effects of any judicial review, and the scope and time of the recovery of costs in rates, which may occur after those costs have been incurred and paid.

Future Generation – 80% carbon reduction target by 2030 (from 2005 levels): MGE has outlined initiatives to achieve our raised target.

- Transitioning away from coal. Columbia: MGE, along with the other plant co-owners, announced plans to retire Columbia Unit 1 and Unit 2 by June 2026. Final timing and retirement dates for Units 1 and 2 are subject to change depending on operational, regulatory, and other factors. MGE has a plan, which it continues to evaluate, to replace the generation from Columbia while maintaining electric service reliability.
  - Elm Road Units: MGE, along with the plant co-owners, announced plans to end the use of coal as a primary fuel at the Elm Road Units and transition the plant to natural gas. Transition plans and costs will be subject to PSCW approval. MGE's remaining use of coal is expected to be further reduced as the Elm Road Units transition to natural gas. By the end of 2030, MGE expects coal to be used only as a backup fuel at the Elm Road Units. This transition will help MGE meet its 2030 carbon reduction goals. By the end of 2032, MGE expects that the Elm Road Units will be fully transitioned away from coal, which will eliminate coal as an internal generation source for MGE.
- Growing renewable generation. MGE is seeking to acquire a joint interest in several renewable generation projects. The forecasted capital expenditures include announced projects such as Paris (Solar and Battery; 20 MW/11 MW), Darien (Solar; 25 MW), Koshkonong (Solar; 30 MW), High Noon (Solar; 30 MW), Sunnyside (Solar and Battery; 20 MW/40 MW), and other projects expected to be announced in the future. See the

2024-2028 capital expenditures forecast disclosed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2023 Annual Report on Form 10-K.

• Natural gas as a fuel source. West Riverside: In June 2024, MGE purchased an additional 25 MW of capacity of West Riverside for approximately \$25 million. After purchase, MGE owns 50 MW of capacity of West Riverside. West Riverside is a natural gas-fired generating plant.

Environmental Initiatives – Natural gas distribution: Building upon our long-standing commitment to providing affordable, sustainable energy, MGE has set a goal to achieve net-zero methane emissions from its natural gas distribution system by 2035. If MGE can accelerate plans to achieve net-zero methane emissions from its natural gas system—through the evolution of new technologies, such as renewable natural gas—it will. MGE is working to reduce overall emissions from its natural gas distribution system cost-effectively. For customers who want to reduce their footprint further, MGE introduced a renewable natural gas program which was made effective starting May 2024 after approval by the PSCW. MGE purchases renewable thermal credits on behalf of customers who voluntarily elect in the program to offset the emissions associated with the customer's monthly natural gas usage.

Solar Procurement Disruptions: MGE is monitoring import regulations under the Uyghur Forced Labor Protection Act and the U.S. Department of Commerce new solar tariffs. These disruptions have a potential to impact current and future solar projects which may result in an increase in costs or delays in construction timelines. In the event that such disruptions cause costs to exceed the levels approved for specific projects, we have filed, and expect to continue to file, notifications with the PSCW and expect to request recovery of any increases in MGE's future rate proceedings. See "Other Matters" below for additional information on the solar procurement disruptions.

Financing and Equity Issuance Plans: As of June 30, 2024, MGE has \$330 million of remaining regulatory authority from the PSCW to issue long-term debt to finance authorized utility capital expenditures. MGE expects to use a portion of the remaining authority during the second half of 2024 to finance authorized utility capital expenditures. In the second half of 2024, MGE Energy expects to begin issuing new shares of common stock to participants in our Direct Stock Purchase and Dividend Reinvestment Plan.

The following discussion is based on the business segments as discussed in Footnote 14 of the Notes to Consolidated Financial Statements in this Report.

# **Results of Operations**

# Three Months Ended June 30, 2024 and 2023

# Electric sales and revenues

The following table compares MGE's electric revenues and electric kWh sales by customer class for each of the periods indicated:

| p                                |               | Reve | enues      |         | S         | ales (kWh)    |         |
|----------------------------------|---------------|------|------------|---------|-----------|---------------|---------|
|                                  | <br>Three Mo  | nths | Ended June | 2 30,   | Three Mor | nths Ended Ju | ne 30,  |
|                                  |               |      |            | %       |           |               | %       |
| (In thousands, except CDD)       | 2024          |      | 2023       | Change  | 2024      | 2023          | Change  |
| Residential                      | \$<br>40,321  | \$   | 40,324     |         | 193,886   | 201,892       | (4.0)%  |

| Industrial                       | 3,445         |      | 3,577      | (3.7)%  | 36,822    | 38,354        | (4.0)%  |
| Other-retail/municipal           | 10,403        |      | 10,243     | 1.6%    | 97,648    | 92,796        | 5.2%    |
| Total retail                     | <br>118,330   |      | 117,572    | 0.6%    | 768,507   | 771,995       | (0.5)%  |
| Sales to the market              | 1,519         |      | 3,554      | (57.3)% | 36,706    | 50,207        | (26.9)% |
| Other                            | 534           |      | 366        | 45.9%   | _         | _             | -%      |
| Total                            | \$<br>120,383 | \$   | 121,492    | (0.9)%  | 805,213   | 822,202       | (2.1)%  |
| Cooling degree days (normal 197) |               |      |            |         | 207       | 205           | 1.0%    |

Electric revenue decreased \$1.1 million during the three months ended June 30, 2024, compared to the same period in the prior year, due to the following:

| (In millions)                     |             |
|-----------------------------------|-------------|
| Sales to the market               | \$<br>(2.0) |
| Decrease in residential volume    | (1.3)       |
| Rate changes                      | 1.2         |
| Customer fixed and demand charges | 0.7         |
| Other                             | 0.3         |
| Total                             | \$<br>(1.1) |

- Sales to the market. Sales to the market typically occur when MGE has more generation and purchases in the
  MISO market than are needed for its customer demand. The excess electricity is then sold to other utilities or
  power marketers in the MISO market. During the three months ended June 30, 2024, market volumes
  decreased compared to the same period in the prior year, reflecting a decrease in sales. Additionally, a
  decrease in the cost of capacity sold further contributed to the decrease in sales. The revenue generated from
  these sales is included in fuel rules costs. See fuel rules discussion in Footnote 9 of the Notes to Consolidated
  Financial Statements.
- Volume. During the three months ended June 30, 2024, residential sales decreased by approximately 4% compared to the same period in the prior year. This decrease was driven by weather conditions during the heating months. This change was a result of a warmer April 2023 compared to 2024 which impacted residential sales.
- Rate changes. In December 2023, the PSCW authorized MGE to increase 2024 rates for retail electric customers by approximately 1.54%. Rates charged to retail customers during the three months ended June 30, 2024, were \$1.2 million higher than those charged during the same period in the prior year. See Footnote 9 of the Notes to Consolidated Financial Statements in this Report for further information on the rate increase. Any increase in rates associated with fuel or purchase power costs are generally offset in fuel and purchased power costs and do not have a significant impact on net income.

#### Electric fuel and purchased power

|                              | <br>Three Months Ended June 30, |    |      |      |           |  |
|------------------------------|---------------------------------|----|------|------|-----------|--|
| (In millions)                | 2024                            |    | 2023 | \$ C | \$ Change |  |
| Fuel for electric generation | \$<br>11.2                      | \$ | 13.6 | \$   | (2.4)     |  |
| Purchased power              | 8.9                             |    | 5.8  |      | 3.1       |  |

The \$2.4 million decrease in fuel for electric generation was due to an approximately 16% decrease in the average cost primarily driven by lower market prices. Internal generation decreased approximately 2%.

Excluding deferred fuel costs, purchased power increased \$1.8 million. The increase in purchased power was due to an approximately 42% increase in average cost. The increase was partially offset by an approximately 5% decrease in market purchases as a result of lower customer sales. Deferred fuel cost recovered during the three months ended June 30, 2024, was \$2.1 million compared to \$0.8 million in the same period of the prior year.

Fuel and purchased power costs are generally offset by electric revenue and do not have a significant impact on net income. MGE expects to seek and receive recovery of fuel and purchased power costs that exceed the fuel rules bandwidth in customer rates. See Footnote 9 of the Notes to Consolidated Financial Statements in this Report for further information on the fuel rules bandwidth.

#### Gas deliveries and revenues

The following table compares MGE's gas revenues and gas therms delivered by customer class for each of the periods indicated:

|                                    | <br>Revenues |       |              |                             |        | Therms Delivered |            |  |
|------------------------------------|--------------|-------|--------------|-----------------------------|--------|------------------|------------|--|
| (In thousands, except HDD and      |              |       |              |                             |        |                  |            |  |
| average                            | Three M      | Ionth | ns Ended Jur | Three Months Ended June 30, |        |                  |            |  |
| rate per therm of retail customer) | 2024         |       | 2023         | % Change                    | 2024   | 2023             | % Change   |  |
| Residential                        | \$<br>15,589 | \$    | 16,688       | (6.6)%                      | 11,822 | 13,593           | (13.0)%    |  |
| Commercial/Industrial              | 7,876        |       | 8,207        | (4.0)%                      | 13,824 | 14,794           | (6.6)%     |  |
| Total retail                       | 23,465       |       | 24,895       | (5.7)%                      | 25,646 | 28,387           | (9.7)%     |  |
| Gas transportation                 | 1,505        |       | 1,235        | 21.9%                       | 15,367 | 16,032           | (4.1)%     |  |
| Other                              | <br>146      |       | 161          | (9.3)%                      |        | <u> </u>         | <b>-</b> % |  |
| Total                              | \$<br>25,116 | \$    | 26,291       | (4.5)%                      | 41,013 | 44,419           | (7.7)%     |  |
| Heating degree days (normal 803)   |              |       |              |                             | 599    | 739              | (18.9)%    |  |
| Average rate per therm of retail   |              |       |              |                             |        |                  |            |  |
| customer                           | \$<br>0.915  | \$    | 0.877        | 4.3%                        |        |                  |            |  |
|                                    |              |       |              |                             |        |                  |            |  |

Gas revenue decreased \$1.2 million during the three months ended June 30, 2024, compared to the same period in the prior year, due to the following:

| (In millions)                  |             |
|--------------------------------|-------------|
| Other                          | \$<br>(8.0) |
| Rate changes                   | (0.4)       |
| Decrease in volume             | (0.1)       |
| Revenue subject to refund, net | 0.1         |
| Total                          | \$<br>(1.2) |

• Rate changes. In December 2023, the PSCW authorized MGE to increase 2024 rates for retail gas customers by approximately 2.44%.

MGE recovers the cost of natural gas in its gas segment through the PGA. Under the PGA, MGE is able to pass through to its gas customers the cost of gas. Changes in PGA recoveries affect revenues but do not change net income in view of the pass-through treatment of the costs. Payments for natural gas decreased driving lower rates during the three months ended June 30, 2024.

The average retail rate per therm for the three months ended June 30, 2024, increased approximately 4% compared to the same period in the prior year, reflecting a decrease in natural gas commodity costs (recovered through the PGA).

# Cost of gas sold

Cost of gas sold decreased \$1.0 million during the three months ended June 30, 2024, compared to the same period in the prior year. Therms delivered decreased approximately 9% and average cost per therm decreased approximately 5%. MGE recovers the cost of natural gas in its gas segment through the PGA as described under gas deliveries and revenue above.

# Consolidated operations and maintenance expenses

During the three months ended June 30, 2024, operations and maintenance expenses increased \$4.7 million, compared to the same period in the prior year. The following contributed to the net change:

| (In millions)                              |           |
|--|-----------|
| Increased customer accounts costs          | \$<br>2.3 |
| Increased transmission costs               | 1.6       |
| Increased electric distribution expenses   | 1.6       |
| Increased electric production expenses     | 0.9       |
| Decreased administrative and general costs | (1.4)     |
| Decreased other expenses                   | (0.3)     |
| Total                                      | \$<br>4.7 |
|  |           |

- Increased customer accounts costs are primarily related to collection of deferred bad debt expense from prior
  years. MGE has received approval to recover deferred bad debt expense from 2020 through 2023 over a twoyear period beginning in 2024. Bad debt expense is generally offset by electric revenue and does not have a
  significant impact on net income.
- Increased transmission costs are primarily a result of an increase in transmission rate and collection of
  deferred costs from prior years. Transmission costs represent ATC and MISO network transmission expenses
  authorized to collect in rates. The PSCW has approved MGE to defer as a regulatory asset or liability, the
  difference between actual costs included in rates and to be recovered or refunded in a future rate proceeding.
  Transmission cost is generally offset by electric revenue and does not have a significant impact on net income.
- Electric distribution expenses were higher in 2024 primarily related to the May 2024 storm response costs.
- Decreased administrative and general costs are primarily related to a decrease in pension and other
  postretirement service costs. These costs are generally offset by electric revenue and do not have a significant
  impact on net income.

# Consolidated depreciation expense

Electric depreciation expense increased \$1.5 million and gas depreciation expense increased \$0.3 million during the three months ended June 30, 2024, compared to the same period in the prior year. Badger Hollow II was placed in service in December 2023. The timing of the in-service dates contributed to the increase in electric depreciation expense.

#### Electric and gas other income

Electric other income decreased \$0.6 million and gas other income decreased \$1.6 million during the three months ended June 30, 2024, compared to the same period in the prior year, primarily related to pension and other postretirement excluding service costs.

#### Nonregulated Energy Operations - MGE Energy and MGE

The nonregulated energy operations are conducted through MGE Energy's subsidiaries: MGE Power Elm Road (the Elm Road Units) and MGE Power West Campus (WCCF), which have been formed to own and lease electric generating capacity to assist MGE. During the three months ended June 30, 2024 and 2023, net income at the nonregulated energy operations segment was \$6.0 million and \$5.5 million, respectively.

# **Transmission Investment Operations - MGE Energy**

The transmission investment segment holds our interest in ATC and ATC Holdco, and its income reflects our equity in the earnings of those investments. ATC Holdco was formed in December 2016 to pursue transmission development opportunities that typically have long development and investment lead times before becoming operational. During the three months ended June 30, 2024 and 2023, other income at the transmission investment segment primarily reflects ATC's operations and was \$2.8 million and \$2.6 million, respectively. See Footnote 3 of the Notes to Consolidated Financial Statements in this Report for summarized financial information regarding ATC and "Other Matters" below for additional information concerning ATC.

# All Other Operations - MGE Energy

#### Other income

The increase of \$0.9 million in other income from all other operations during the three months ended June 30, 2024, primarily results from decreased investment distribution losses from our venture capital funds compared to the same period in the prior year. These venture capital investments support early-stage companies working to advance smart technologies, the customer experience, distributed energy resources, electrification, cybersecurity, and other priorities for utility companies such as greater sustainability.

# **Consolidated Income Taxes - MGE Energy and MGE**

See Footnote 4 of the Notes to Consolidated Financial Statements in this Report for the effective tax rate reconciliation.

# Noncontrolling Interest, Net of Tax - MGE

Noncontrolling interest, net of tax, reflects the accounting required for MGE Energy's interest in MGE Power Elm Road (the Elm Road Units) and MGE Power West Campus (WCCF). MGE Energy owns 100% of MGE Power Elm Road and MGE Power West Campus. They are not owned by MGE. Due to the contractual agreements for these projects with MGE, the entities are considered VIEs with respect to MGE and their results are consolidated with those of MGE, the primary beneficiary of the VIEs. The following table shows MGE Energy's noncontrolling interest, net of tax, reflected on MGE's consolidated statement of income:

|                       | Three Months Ended |       |      |  |
|-----------------------|--------------------|-------|------|--|
|                       | June               | e 30, |      |  |
| (In millions)         | 2024               |       | 2023 |  |
| MGE Power Elm Road    | \$<br>3.9          | \$    | 3.6  |  |
| MGE Power West Campus | 1.9                |       | 1.8  |  |

# **Results of Operations**

# Six Months Ended June 30, 2024 and 2023

#### Electric sales and revenues

The following table compares MGE's electric revenues and electric kWh sales by customer class for each of the periods indicated:

| perious indicated.               |               |      |              |          |             |               |          |  |
|----------------------------------|---------------|------|--------------|----------|-------------|---------------|----------|--|

| Sales to the market              | 2,595         |      | 6,312        | (58.9)%  | 61,687      | 53,823        | 14.6%    |  |
| Other revenues                   | 1,479         |      | 1,190        | 24.3%    | _           | _             | -%       |  |
| Total                            | \$<br>236,508 | \$   | 238,736      | (0.9)%   | 1,570,973   | 1,569,111     | 0.1%     |  |
| Cooling degree days (normal 197) |               |      |              |          | 207         | 205           | 1.0%     |  |

Electric revenue decreased \$2.2 million during the six months ended June 30, 2024, compared to the same period in the prior year, due to the following:

| (In millions)                     |             |
|-----------------------------------|-------------|
| Sales to the market               | \$<br>(3.7) |
| Decrease in residential volume    | (2.4)       |
| Revenue subject to refund, net    | (1.3)       |
| Rate changes                      | 3.2         |
| Customer fixed and demand charges | 1.7         |
| Other                             | 0.3         |
| Total                             | \$<br>(2.2) |

Sales to the market. Sales to the market typically occur when MGE has more generation and purchases in the
MISO market than are needed for its customer demand. The excess electricity is then sold to other utilities or
power marketers in the MISO market. During the six months ended June 30, 2024, market volumes increased
compared to the same period in the prior year, reflecting an increase in sales. However, the cost of capacity
sold decreased offsetting the revenue generated from increased sales to the market from excess generation
and purchases. The revenue generated from these sales is included in fuel rules costs. See fuel rules discussion

in Footnote 9 of the Notes to Consolidated Financial Statements.

- Volume. During the six months ended June 30, 2024, residential sales decreased by approximately 4% compared to the same period in the prior year. This decrease was driven by weather conditions during the heating months. This change was a result of a warmer April 2023 compared to 2024 which impacted residential sales.
- Revenue subject to refund. For cost recovery mechanisms, any over-collection of revenues resulting from costs authorized to be collected from customers in rates exceeding actual costs is recorded as a reduction of revenue in the period incurred, as the over-collection is expected to be refunded to customers in a subsequent period. In the year the over-collection is refunded, rates are reduced and offset as revenue subject to refund. There is no net income impact in the year the costs are refunded.
- Rate changes. In December 2023, the PSCW authorized MGE to increase 2024 rates for retail electric customers by approximately 1.54%. Rates charged to retail customers during the six months ended June 30, 2024, were \$3.2 million higher than those charged during the same period in the prior year. See <u>Footnote 9</u> of the Notes to Consolidated Financial Statements in this Report for further information on the rate increase. Any increase in rates associated with fuel or purchase power costs are generally offset in fuel and purchased power costs and do not have a significant impact on net income.
- Customer fixed and demand charges. During the six months ended June 30, 2024, fixed and demand charges increased \$1.7 million primarily attributable to the increase in demand charges for commercial customers.

# Electric fuel and purchased power

|                              | <br>Six Months Ended June 30, |      |           |  |  |
|------------------------------|-------------------------------|------|-----------|--|--|
| (In millions)                | 2024                          | 2023 | \$ Change |  |  |
| Fuel for electric generation | \$<br>23.9 \$                 | 27.4 | \$ (3.5)  |  |  |
| Purchased power              | 18.3                          | 21.2 | (2.9)     |  |  |

The \$3.5 million decrease in fuel for electric generation was due to an approximately 21% decrease in the average cost partially offset by an approximately 11% increase in internal generation. Renewable generation increased approximately 29% driven by new generation sources including Badger Hollow II. Columbia generation was higher during the six months ended June 30, 2024, compared to the same period in the prior year as a result of market prices.

Excluding deferred fuel costs, purchased power decreased \$5.4 million. The decrease in purchased power was due to an approximately 30% decrease in market purchases as a result of lower customer sales and increased internal generation. This decrease was partially offset by an approximately 3% increase in average cost. Deferred fuel cost recovered during the six months ended June 30, 2024, was \$4.1 million compared to \$1.6 million in the same period of the prior year.

Fuel and purchased power costs are generally offset by electric revenue and do not have a significant impact on net income. MGE expects to seek and receive recovery of fuel and purchased power costs that exceed the fuel rules bandwidth in customer rates. See <a href="Footnote 9">Footnote 9</a> of the Notes to Consolidated Financial Statements in this Report for further information on the fuel rules bandwidth.

#### Gas deliveries and revenues

The following table compares MGE's gas revenues and gas therms delivered by customer class for each of the periods indicated:

|   | Revenues |         |       |           |          | The                       | erms Delivere | d        |
|---|----------|---------|-------|-----------|----------|---------------------------|---------------|----------|
| (In thousands, except HDD and average     |          | Six Mo  | onths | Ended Jun | e 30,    | Six Months Ended June 30, |               |          |
| rate per therm of retail customer)        |          | 2024    |       | 2023      | % Change | 2024                      | 2023          | % Change |
| Residential                               | \$       | 58,987  | \$    | 72,412    | (18.5)%  | 55,629                    | 60,746        | (8.4)%   |
| Commercial/Industrial                     |          | 37,400  |       | 49,710    | (24.8)%  | 53,048                    | 57,249        | (7.3)%   |
| Total retail                              |          | 96,387  |       | 122,122   | (21.1)%  | 108,677                   | 117,995       | (7.9)%   |
| Gas transportation                        |          | 3,585   |       | 3,767     | (4.8)%   | 36,256                    | 38,305        | (5.3)%   |
| Other revenues                            |          | 313     |       | 364       | (14.0)%  | _                         | _             | -%       |
| Total                                     | \$       | 100,285 | \$    | 126,253   | (20.6)%  | 144,933                   | 156,300       | (7.3)%   |
| Heating degree days (normal 4,364)        |          |         |       |           |          | 3,580                     | 3,929         | (8.9)%   |
| Average rate per therm of retail customer | \$       | 0.887   | \$    | 1.035     | (14.3)%  |                           |               |          |

Gas revenue decreased \$26.0 million during the six months ended June 30, 2024, compared to the same period in the prior year, due to the following:

| (In millions)      |          |
|--------------------|----------|
| Rate changes       | \$(15.5) |
| Decrease in volume | (9.0)    |
| Other              | (1.5)    |
| Total              | \$(26.0) |

• Rate changes. In December 2023, the PSCW authorized MGE to increase 2024 rates for retail gas customers by approximately 2.44%.

MGE recovers the cost of natural gas in its gas segment through the purchased gas adjustment clause (PGA). Under the PGA, MGE is able to pass through to its gas customers the cost of gas. Changes in PGA recoveries affect revenues but do not change net income in view of the pass-through treatment of the costs. Payments for natural gas decreased driving lower rates during the six months ended June 30, 2024.

The average retail rate per therm excluding customer fixed charges for the six months ended June 30, 2024, decreased approximately 14% compared to the same period in the prior year, reflecting a decrease in natural gas commodity costs (recovered through the PGA).

- *Volume*. For the six months ended June 30, 2024, retail gas deliveries decreased approximately 8% compared to the same period in the prior year primarily attributable to unfavorable weather conditions in the first half of 2024.
- Other. For the six months ended June 30, 2024, other gas revenues decreased primarily related to lower residential customer fixed charges. The PSCW approved a reduction in the customer fixed charge component of the residential gas rate in the 2024 rate proceeding.

# Cost of gas sold

Cost of gas sold decreased \$27.0 million during the six months ended June 30, 2024, compared to the same period in the prior year. Therms delivered decreased approximately 7% and cost per therm decreased approximately 31%.

MGE recovers the cost of natural gas in its gas segment through the PGA as described under gas deliveries and revenues above.

### Consolidated operations and maintenance expenses

During the six months ended June 30, 2024, operations and maintenance expenses increased \$8.8 million, compared to the same period in the prior year. The following contributed to the net change:

| (In millions)                              |       |
|--|-------|
| Increased customer accounts costs          | \$4.6 |
| Increased transmission costs               | 2.9   |
| Increased electric production expenses     | 1.5   |
| Increased electric distribution expenses   | 1.4   |
| Decreased administrative and general costs | (1.5) |
| Decreased other expenses                   | (0.1) |
| Total                                      | \$8.8 |

- Increased customer accounts costs are primarily related to collection of deferred bad debt expense from prior
  years. MGE has received approval to recover deferred bad debt expense from 2020 through 2023 over a twoyear period beginning in 2024. Bad debt expense is generally offset by electric revenue and does not have a
  significant impact on net income.
- Increased transmission costs are primarily a result of an increase in transmission rate and collection of
  deferred costs from prior years. Transmission costs represent ATC and MISO network transmission expenses
  authorized to collect in rates. The PSCW has approved MGE to defer as a regulatory asset or liability, the
  difference between actual costs included in rates and to be recovered or refunded in a future rate proceeding.
  Transmission cost is generally offset by electric revenue and does not have a significant impact on net income.
- Increased electric production expenses are primarily related to operating and maintenance costs for renewable generating facilities. MGE continues to add new renewable generation sites including the second phase of Badger Hollow which went online in December 2023.
- Increased distribution expenses were higher in 2024 primarily related to the May 2024 storm response costs.
- Decreased administrative and general costs are primarily related to a decrease in pension and other
  postretirement service costs. These costs are generally offset by electric revenue and do not have a significant
  impact on net income.

# Consolidated depreciation expense

Electric depreciation expense increased \$3.2 million and gas depreciation expense increased \$0.6 million during the six months ended June 30, 2024, compared to the same period in the prior year. MGE purchased West Riverside in March 2023 and Badger Hollow II was placed in service in December 2023. The timing of the in-service dates contributed to the increase in electric depreciation expense.

# Electric and gas other income

Electric other income decreased \$1.3 million and gas other income decreased \$2.6 million during the six months ended June 30, 2024, compared to the same period in the prior year, primarily related to pension and other postretirement excluding service costs.

### Nonregulated Energy Operations - MGE Energy and MGE

The nonregulated energy operations are conducted through MGE Energy's subsidiaries: MGE Power Elm Road (the Elm Road Units) and MGE Power West Campus (WCCF), which have been formed to own and lease electric generating capacity to assist MGE. During the six months ended June 30, 2024 and 2023, net income at the nonregulated energy operations segment was \$11.9 million and \$11.0 million, respectively.

# **Transmission Investment Operations - MGE Energy**

The transmission investment segment holds our interest in ATC and ATC Holdco, and its income reflects our equity in the earnings of those investments. ATC Holdco was formed in December 2016 to pursue transmission development opportunities that typically have long development and investment lead times before becoming operational. During the six months ended June 30, 2024 and 2023, other income at the transmission investment segment primarily reflects ATC's operations and was \$5.5 million and \$5.2 million, respectively. See Footnote 3 of the Notes to Consolidated Financial Statements in this Report for summarized financial information regarding ATC and "Other Matters" below for additional information concerning ATC.

#### All Other Operations - MGE Energy

#### Other income

The increase of \$1.1 million in other income from all other operations during the six months ended June 30, 2024, primarily results from decreased investment distribution losses from our venture capital funds compared to the same period in the prior year. These venture capital investments support early-stage companies working to advance smart technologies, the customer experience, distributed energy resources, electrification, cybersecurity, and other priorities for utility companies such as greater sustainability.

# **Consolidated Income Taxes - MGE Energy and MGE**

See <u>Footnote 4</u> of the Notes to Consolidated Financial Statements in this Report for the effective tax rate reconciliation.

#### Noncontrolling Interest, Net of Tax - MGE

Noncontrolling interest, net of tax, reflects the accounting required for MGE Energy's interest in MGE Power Elm Road (the Elm Road Units) and MGE Power West Campus (WCCF). MGE Energy owns 100% of MGE Power Elm Road and MGE Power West Campus. They are not owned by MGE. Due to the contractual agreements for these projects with MGE, the entities are considered VIEs with respect to MGE and their results are consolidated with those of MGE, the primary beneficiary of the VIEs. The following table shows MGE Energy's noncontrolling interest, net of tax, reflected on MGE's consolidated statement of income:

|                       | Six Months Ended |    |      |  |  |  |  |  |
|-----------------------|------------------|----|------|--|--|--|--|--|
|                       | <br>June 30,     |    |      |  |  |  |  |  |
| (In millions)         | 2024             |    | 2023 |  |  |  |  |  |
| MGE Power Elm Road    | \$<br>7.7        | \$ | 7.3  |  |  |  |  |  |
| MGE Power West Campus | 3.6              |    | 3.6  |  |  |  |  |  |

# Contractual Obligations and Commercial Commitments - MGE Energy and MGE

There were no material changes, other than from the normal course of business, to MGE Energy's and MGE's contractual obligations (representing cash obligations that are considered to be firm commitments) and commercial commitments (representing commitments triggered by future events) during the six months ended June 30, 2024, except as noted below. Further discussion of the contractual obligations and commercial commitments is included in Footnote 16 of the Notes to Consolidated Financial Statements and "Contractual Obligations and Commercial Commitments for MGE Energy and MGE" under Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2023 Annual Report on Form 10-K.

# Purchase Contracts - MGE Energy and MGE

See Footnote 8.c. of Notes to Consolidated Financial Statements in this Report for a description of commitments as of June 30, 2024, that MGE Energy and MGE have entered with respect to various commodity supply and transportation contracts to meet their obligations to deliver natural gas to customers.

# **Liquidity and Capital Resources**

MGE Energy and MGE expect to have adequate liquidity to support future operations and capital expenditures over the next twelve months. Available resources include cash and cash equivalents, operating cash flows, liquid assets, borrowing working capacity under revolving credit facilities, and access to equity and debt capital markets. MGE Energy expects to begin issuing new shares of common stock to participants in our Direct Stock Purchase and Dividend Reinvestment Plan starting in the second half of 2024. MGE Energy also expects to generate funds from operations and both long-term and short-term debt financing. See "Credit Facilities" under Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources in the 2023 Annual Report on Form 10-K for information regarding MGE Energy's and MGE's credit facilities.

#### **Cash Flows**

The following summarizes cash flows for MGE Energy and MGE during the six months ended June 30, 2024 and 2023:

|                              | MGE Energy    |            |    | MGE       |    |           |
|------------------------------|---------------|------------|----|-----------|----|-----------|
| (In thousands)               | 2024          | 2023       |    | 2024      |    | 2023      |
| Cash provided by (used for): |               |            |    |           |    |           |
| Operating activities         | \$<br>130,434 | \$ 126,991 | \$ | 128,429   | \$ | 125,050   |
| Investing activities         | (113,509)     | (111,759)  |    | (112,516) |    | (108,506) |
| Financing activities         | (12,414)      | (11,943)   |    | (15,484)  |    | (13,720)  |

# **Cash Provided by Operating Activities**

Cash flows from operating activities for MGE Energy and MGE principally reflect the receipt of customer payments for electric and gas service and outflows related to fuel for electric generation, purchased power, gas, and operation and maintenance expenditures.

The principal increases (decreases) in cash flows from operating activities during the six months ended June 30, 2024, compared to the same period in 2023, were as follows:

| (In millions)  | MGE Energy | <br>MGE    |
|--|------------|------------|
| Lower payments for fuel and purchased power at our generation plants, as well as         |            |            |
| lower natural gas costs to our customers, primarily driven by a decrease in the price of |            |            |
| natural gas  | \$<br>48.3 | \$<br>48.3 |
| Higher payments for other operation and maintenance expenses                             | (0.3)      | (1.4)      |
| Lower overall collections from customers, driven by lower purchased gas costs            |            |            |
| adjusted through the PGA customer rate   | (43.6)     | (43.6)     |
| Higher payments for interest, driven by MGE's issuance of long-term debt during the      |            |            |
| second half of 2023  | (2.9)      | (2.9)      |
| Lower payments for federal and state taxes   | 2.0        | 3.3        |
| Other operating activities   | (0.1)      | (0.3)      |
| Increase in cash provided by operating activities  | \$<br>3.4  | \$<br>3.4  |
|  |            |            |

# **Capital Requirements and Investing Activities**

# MGE Energy

MGE Energy's cash used for investing activities increased \$1.8 million during the six months ended June 30, 2024, when compared to the same period in the prior year.

Capital expenditures during the six months ended June 30, 2024, were \$111.6 million. This amount represents an increase of \$3.9 million from the expenditures made in the same period in the prior year. This increase primarily reflects an increase in gas utility expenditures.

Proceeds from the sale of investments increased \$2.1 million during the six months ended June 30, 2024, when compared to the same period in the prior year.

#### MGE

MGE's cash used for investing activities increased \$4.0 million during the six months ended June 30, 2024, when compared to the same period in the prior year.

Capital expenditures during the six months ended June 30, 2024, were \$111.6 million. This amount represents an increase of \$3.9 million from the expenditures made in the same period in the prior year. This increase primarily reflects an increase in gas utility expenditures.

### **Capital Expenditures**

MGE Energy's and MGE's liquidity are primarily affected by their capital expenditure requirements. During the six months ended June 30, 2024, capital expenditures for MGE Energy and MGE totaled \$111.6 million, which included \$107.6 million of utility capital expenditures. The utility capital expenditures include the purchase of an additional 25 MW of West Riverside, expenditures for renewable generation facilities, and investments in enhanced metering solutions.

MGE does not currently expect any material changes to its total forecasted expenditures as presented in the 2024 through 2028 capital expenditure forecast included under Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources in the 2023 Annual Report on Form 10-K. MGE's plan to achieve its target of 80% carbon reduction by 2030 (from 2005 levels) is based on the transition away from coal, addition of new renewable generation, and additional generation sources that provide the reliable energy to serve demand dependably. The mix of generation sources presented in the 2024 through 2028 capital expenditure forecast may shift based on reliability needs as MGE continues on the path to achieve its carbon reduction goals. Additionally, MGE is monitoring import regulations under the Uyghur Forced Labor Protection Act and the U.S. Department of Commerce new solar tariffs. These disruptions have had and may continue to impact current and future solar projects by increasing costs or causing delays in construction timelines. As projects are delayed, timing of capital expenditures will be correspondingly shifted. See "Other Matters" below for additional information on the solar procurement disruptions.

### **Cash Used for Financing Activities**

The principal sources and uses of cash are related to short-term and long-term borrowings and repayments and the payment of cash dividends.

The principal increases (decreases) in cash flows from financing activities during the six months ended June 30, 2024, compared to the same period in 2023, were as follows:

| (In millions)   | MGE Energy | MGE         |
|---|------------|-------------|
| Higher cash dividends paid, dividend rate per share (\$0.855 vs. \$0.815)             | \$ (1.5)   | \$<br>_     |
| Higher cash dividends to parent (MGE Energy)  | _          | (3.0)       |
| Lower distributions to parent (MGE Energy) from noncontrolling interest, representing |            |             |
| distributions from MGE Power Elm Road and MGE Power West Campus <sup>(a)</sup>        | _          | 0.3         |
| Change in long-term debt <sup>(b)</sup>   | (50.1)     | (50.1)      |
| Change in short-term debt borrowings, net   | 50.3       | 50.3        |
| Other financing activities  | 0.8        | 0.8         |
| Decrease in cash flows from financing activities                                      | \$ (0.5)   | \$<br>(1.7) |

- (a) The noncontrolling interest arises from the accounting required for the entities, which are not owned by MGE but are consolidated as VIEs.
- (b) During the six months ended June 30, 2023, MGE issued \$50 million of senior unsecured notes that were used to assist with financing additional capital expenditures and other corporate obligations. In addition, \$19.3 million of Industrial Development Revenue Bonds were tendered by their holders as required by the terms of the bonds and remarketed as permitted by those terms.

#### **Capitalization Ratios**

MGE Energy's capitalization ratios were as follows:

|                               | MGE E               | nergy |  |  |
|-------------------------------|---------------------|-------|--|--|
|                               | June 30, 2024 Decen |       |  |  |
| Common shareholders' equity   | 59.9%               | 59.9% |  |  |
| Long-term debt <sup>(a)</sup> | 37.0%               | 38.1% |  |  |
| Short-term debt               | 3.1%                | 2.0%  |  |  |

(a) Includes the current portion of long-term debt.

#### **Credit Ratings**

MGE Energy's and MGE's access to the capital markets, including, in the case of MGE, the commercial paper market, and their respective financing costs in those markets, may depend on the credit ratings of the entity that is accessing the capital markets.

None of MGE Energy's or MGE's borrowing is subject to default or prepayment as a result of a downgrading of credit ratings, although a downgrading of MGE's credit ratings would increase fees and interest charges under both MGE Energy's and MGE's credit agreements.

#### **Environmental Matters**

See the discussion of environmental matters included in the 2023 Annual Report on Form 10-K, as updated by Footnote 8.a. of Notes to Consolidated Financial Statements in this Report.

#### **Other Matters**

### **Rate Matters**

In December 2023, the PSCW approved the 2024/2025 rate application for an increase of 1.54% for electric rates and a 2.44% increase for gas rates in 2024. The PSCW also approved a 4.17% increase for electric rates and a 1.32% increase to gas rates for 2025. MGE filed a 2025 Fuel Cost Plan with the PSCW in June 2024. The plan would lower the 2025 increase in electric rates to 2.47%, reflecting lower expected fuel costs. MGE expects a final decision from the PSCW on the Fuel Cost Plan by the end of 2024.

Details related to MGE's 2024/2025 rate proceeding are shown in the table below:

|                             |              |                     |            |               | Authorized            | Common Equity     |                |
|-----------------------------|--------------|---------------------|------------|---------------|-----------------------|-------------------|----------------|
|                             | P            | Authorized          |            |               | Return on             | Component of      |                |
|                             | Average Rate |                     | Authorized |               | Common                | Regulatory        |                |
| (Dollars in thousands)      |              | Base <sup>(a)</sup> |            | erage CWIP(b) | Equity <sup>(c)</sup> | Capital Structure | Effective Date |
| Electric (2024 Test Period) | \$           | 1,185,550           | \$         | 10,727        | 9.7%                  | 56.13%            | 1/1/2024       |
| Gas (2024 Test Period)      | \$           | 335,533             | \$         | 7,160         | 9.7%                  | 56.13%            | 1/1/2024       |
| Electric (2025 Test Period) | \$           | 1,241,502           | \$         | 7,106         | 9.7%                  | 56.06%            | 1/1/2025       |
| Gas (2025 Test Period)      | \$           | 341,369             | \$         | 7,146         | 9.7%                  | 56.06%            | 1/1/2025       |

- (a) Average rate base amounts reflect MGE's allocated share of rate base and do not include construction work in progress (CWIP) or a cash working capital allowance and were calculated using a forecasted 13-month average for the test periods. The PSCW provides a return on selected CWIP and a cash working capital allowance by adjusting the percentage return on rate base.
- (b) 50% of the forecasted 13-month average CWIP for the test periods earns an AFUDC return. Projects eligible to earn 100% AFUDC are excluded from this balance and discussed further in the Management Discussion and Analysis of Financial Condition and Results of Operations Significant Events section.
- (c) Authorized returns on common equity may not be indicative of actual returns earned or projections of future returns, as actual returns will be affected by the volume of electricity or gas sold.

See Footnote 9 of Notes to Consolidated Financial Statements in this Report for further discussion of rate proceedings and an earnings sharing mechanism if MGE earns above the authorized return on common equity in the rate order.

#### ATC

MISO transmission owners, including ATC, are involved in two complaints filed at FERC by several parties challenging that the base ROE in effect for MISO transmission owners, including ATC, was no longer just and reasonable. Each complaint provided for a 15-month statutory refund period: November 12, 2013 through February 11, 2015 (the "First Complaint Period") and February 12, 2015 through May 11, 2016 (the "Second Complaint Period").

In May 2020, FERC issued an order further refining the methodology for setting authorized ROE. This refined methodology increased the authorized ROE from 9.88% to 10.02%. This base ROE is effective for the First Complaint Period and for all periods following September 2016. This order also dismissed the second complaint. Accordingly, no refunds were ordered for the Second Complaint Period.

As a result of the May 2020 FERC order, our share of ATC's earnings reflected a \$0.6 million reduction of our reserve. Additionally, our share of ATC's earnings reflected the derecognition of a possible refund related to the Second Complaint Period as ATC considered such a refund to be no longer probable. However, due to pending requests for rehearing, a loss related to the 2015 complaint remains possible. Our share of the estimated refund for the Second Complaint Period is approximately \$2.3 million. MGE has not recorded a possible loss for the Second Complaint Period.

Several petitions for review of FERC's prior orders were filed with the United States Court of Appeals for the District of Columbia Circuit (the "Court") and an oral argument was held in November 2021. In August 2022, the Court ruled that four of the five arguments made by the complaining parties were unpersuasive. However, the Court agreed that FERC's decision to reintroduce a risk-premium model into its ROE methodology was arbitrary and capricious. The Court vacated the underlying orders for the First Complaint Period and remanded to FERC for further proceedings. In 2022, our share of ATC's earnings reflected an estimated possible loss of approximately \$0.9 million, inclusive of interest and net of tax, for a possible additional refund for the First Complaint Period and for the period following the Second Complaint Period. Although the Court agreed that FERC was correct to use the base ROE established in the first complaint to adjudicate the second, and that FERC was right to dismiss the second complaint, the second complaint was also remanded for FERC to reopen proceedings. Any reduction in ATC's ROE could result in lower equity earnings and distributions from ATC in the future.

We derived approximately 6.7% and 6.2% of our net income during the six months ended June 30, 2024 and 2023, respectively, from our investment in ATC.

# **Uyghur Forced Labor Protection Act**

In June 2021, the U.S. Customs and Border Protection (CBP) issued a Withhold Release Order (WRO) against silica-based products made by Hoshine Silicon Industry Co. Ltd., a company located in China's Xinjiang Uyghur Autonomous Region. As a result of this WRO, CBP is holding many solar panels imported into the United States until importers can prove that the panels do not contain materials originating from this region. The Uyghur Forced Labor Protection Act (UFLPA), a federal law that became effective on June 21, 2022, further established that all goods mined, produced, or manufactured wholly or in part in Xinjiang or by certain defined entities are prohibited from U.S. importation. Suppliers for MGE's current solar projects were able to provide the CBP sufficient documentation to meet WRO compliance requirements, and MGE expects the same will be true for UFLPA purposes, however we cannot currently predict what, if any, impact the UFLPA will have on the overall supply of solar panels into the United States and the related impact to timing and cost of solar projects included in our capital plan. In the event that such disruptions cause costs to exceed the levels approved for specific projects, we have filed and expect to continue to file a notification with the PSCW and expect to request recovery of any cost increases in MGE's future rate proceedings.

### **U.S. Department of Commerce - Solar Cells and Modules**

In August 2023, the U.S. Department of Commerce issued its final determination on a solar tariff investigation that began in 2022, finding that Chinese manufacturers were circumventing tariffs on solar panels by shipping them through four Southeast Asian countries. A 24-month exemption from tariffs for solar panel and module imports

from these four countries was in effect from June 2022 until June 6, 2024. In May 2024, the Biden Administration announced that bifacial solar panels would be subject to safeguard tariffs under Section 201 of the Trade Act of 1974, of which they were previously excluded. President Biden also directed U.S. Trade Representatives to increase tariffs under Section 301 from 25% to 50% on solar cells and modules. MGE continues to assess the potential impact of these tariffs on current and future solar projects which may result in an increase in costs or delays in construction timelines. In the event that such disruptions cause costs to exceed the levels approved for specific projects, we have filed and expect to continue to file a notification with the PSCW and expect to request recovery of any cost increases in MGE's future rate proceedings.

# **Adoption of Accounting Principles and Recently Issued Accounting Pronouncements**

See Footnote 2 of Notes to Consolidated Financial Statements in this Report for discussion of new accounting pronouncements.

# Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There were no material changes to the market risks disclosed in Item 7A. Quantitative and Qualitative Disclosures About Market Risk in our 2023 Annual Report on Form 10-K.

# Item 4. Controls and Procedures.

During the second quarter of 2024, each registrant's management, including the principal executive officer and principal financial officer, evaluated its disclosure controls and procedures related to the recording, processing, summarization, and reporting of information in its periodic reports that it files with the SEC. These disclosure controls and procedures have been designed to ensure that material information relating to that registrant, including its subsidiaries, is accumulated and made known to that registrant's management, including these officers, by other employees of that registrant and its subsidiaries as appropriate to allow timely decisions regarding required disclosure, and that this information is recorded, processed, summarized, evaluated, and reported, as applicable, within the time periods specified in the SEC's rules and forms. The evaluations take into account changes in the internal and external operating environments that may impact those controls and procedures. Due to the inherent limitations of control systems, not all misstatements may be detected. These inherent limitations include the realities that judgments in decision making can be faulty and breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. Also, MGE Energy does not control or manage certain of its unconsolidated entities and thus, its access and ability to apply its procedures to those entities is more limited than is the case for its consolidated subsidiaries.

As of June 30, 2024, each registrant's principal executive officer and principal financial officer concluded that its disclosure controls and procedures were effective. Each registrant intends to strive continually to improve its disclosure controls and procedures to enhance the quality of its financial reporting.

During the quarter ended June 30, 2024, there were no changes in either registrant's internal controls over financial reporting that materially affected, or are reasonably likely to affect materially, that registrant's internal control over financial reporting.

# PART II. OTHER INFORMATION.

# Item 1. Legal Proceedings.

MGE Energy and its subsidiaries, including MGE, from time to time are involved in various legal proceedings that are handled and defended in the ordinary course of business. See Footnote 8.a. and 8.b. of Notes to Consolidated Financial Statements in this Report for more information.

#### Item 1A Risk Factors.

There were no material changes from the risk factors disclosed in Item 1A. Risk Factors in our 2023 Annual Report on Form 10-K.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Under the MGE Energy, Inc. Stock Plan, common stock shares purchased by plan participants may be either shares issued by MGE Energy or shares purchased on the open market, as determined from time to time by MGE Energy. Shares issued by MGE Energy are covered by an existing registration statement. Shares purchased in the open market are purchased at the direction of the plan participants by MGE Energy's transfer agent's securities broker-dealer for the accounts of those plan participants. Subject to the plan's restrictions, the timing and amount of open market purchases is determined by the plan participants and the broker-dealer. MGE Energy is not involved in the open market purchases. During 2024, shares purchased under the Stock Plan have been purchased in the open market. MGE Energy expects to begin issuing new shares of common stock to participants in its Direct Stock Purchase and Dividend Reinvestment Plan starting in the second half of 2024.

# Item 3. Defaults Upon Senior Securities.

None.

# Item 4. Mine Safety Disclosures.

Not applicable to MGE Energy and MGE.

### Item 5. Other Information.

During the three months ended June 30, 2024, no director or officer of MGEE Energy or Madison Gas and Electric adopted or terminated a Rule 10b5-1 trading arrangement or non-Rule 10b5-1 trading arrangement, as defined in Item 408(a) of Regulation S-K.
